State tests serve as a snapshot that helps schools and districts evaluate their instructional programs by providing information about student readiness in math, English language arts, and science. Because of this, other information (e.g., opportunity to learn, mode of learning, access to grade-level content, attendance, course grades) should be considered when reviewing your data.

Your student's testing history helps you know how your student is progressing from one year to the next. To learn more about a particular test, please click on the test.

Welcome,
Demo Student 1

As you scroll, you will see your student's Performance by Category. Information in this table helps you know how your student is performing in each category. It shows the points earned, points possible, and lists ways that you can support your student.

For more information about supporting your student, you can click on the Oklahoma Family Guides link.

OKLAHOMA SCHOOL TESTING PROGRAM

Parent/Student Portal

● Performance by Category

Information in this table helps you know how Demo Student 1 is performing in each category.

| Points Earned/Possible	Ways to Support

5/10
Below Standard

Number & Operations
- Help your student determine if an answer is reasonable and continue developing problem-solving skills and number sense (such as comparing prices and estimating the savings for items that are on sale).

7/14
Below Standard

Algebraic Reasoning
- Help your student make connections in order to solve real world and mathematical problems that contain proportions, equations, and inequalities. (For example, using a map, figure out how long a trip will take and what time you should leave in order to arrive on time. Calculate the gasoline mileage, and estimate the total cost of gasoline for long trips.)

7/16
Below Standard

Geometry & Measurement
- Focus on proportional reasoning and how it relates to geometric shapes. (For example, find the surface area and volume of a room in your home. How do the sizes compare with each other, and, if we doubled or halved the room dimensions, how would the sizes be impacted? Or, if you had a larger or smaller tire, how would the area and circumference be impacted?)

7/10
Below Standard

Data & Probability
- Collect and analyze data, including making predictions using measures of central tendency and probability by having your student look at different real-world graphs and find the average, median, mode, and range of the number data. Ask them questions about the data. (For example, what does this data tell your student? What does it make your student wonder?)
- To make predictions using probability, play a board game or a card game together. Ask about the probabilities involved and what predictions could be made using those probabilities (such as landing on a certain square or rolling a certain number).

For more information on supporting your student, please visit: **Oklahoma Family Guides.** ↗

eMetric

Next you will see your student's Performance Level Comparison graph. This graph helps you know how your student's scores compare to other Oklahoma students taking the same test. **Please note:** For the preliminary release of the 2022 assessments, school and district comparisons will not be shown.
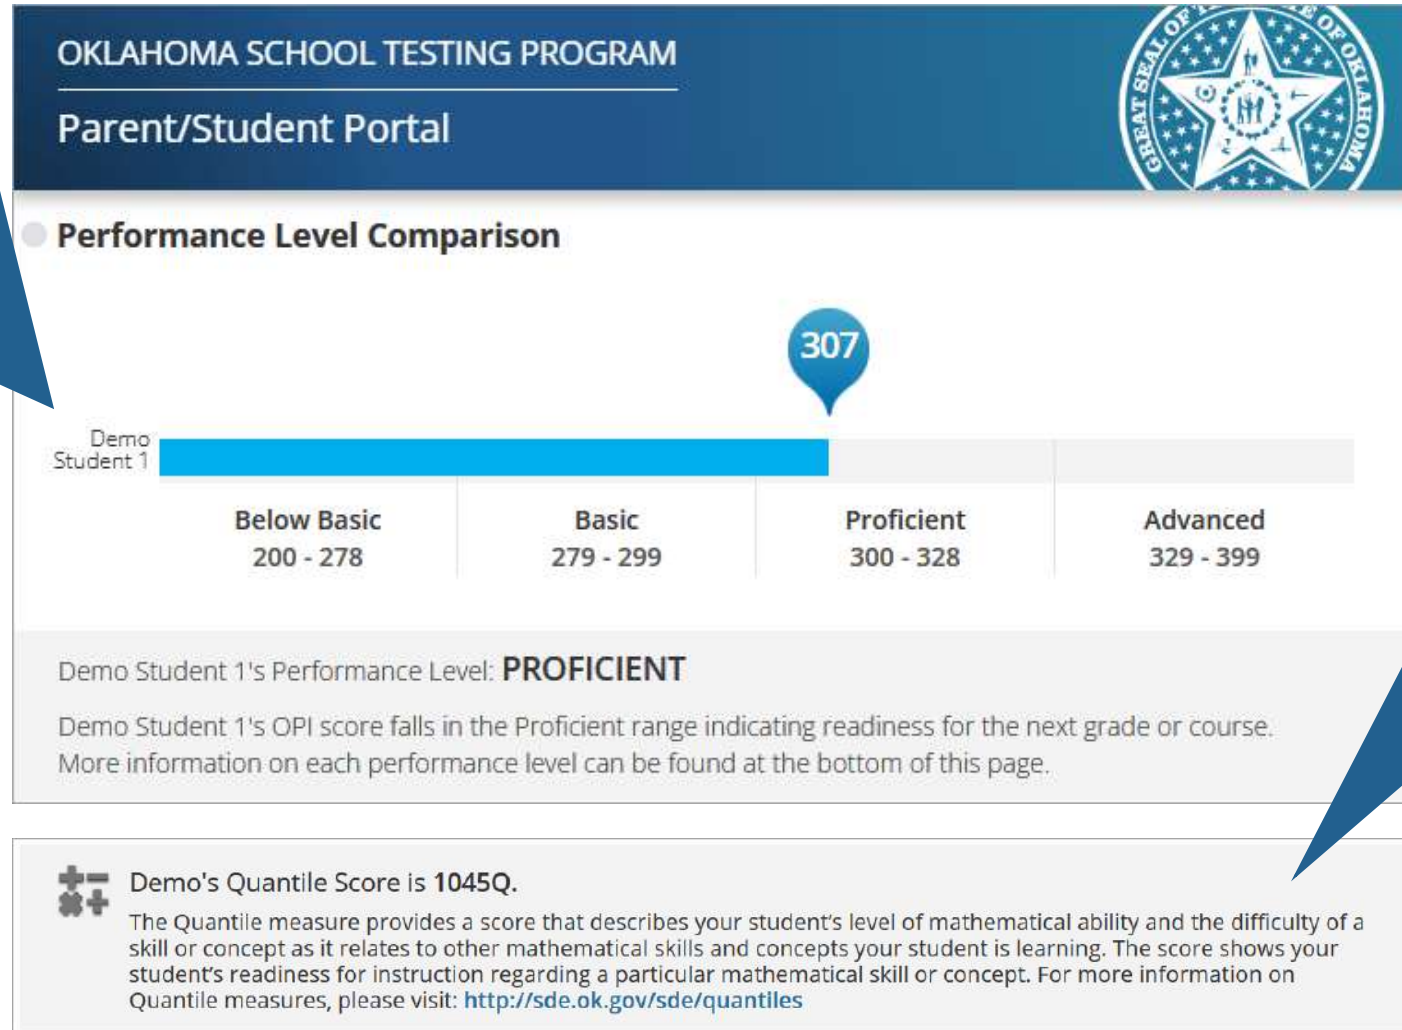

For Mathematics, your student's Quantile Score will be displayed. The Lexile Measure will be displayed when viewing English Language Arts. Both measures include links that provide additional information.

OKLAHOMA SCHOOL TESTING PROGRAM

Performance Level Comparison

307

Demo Student 1

Below Basic	Basic	Proficient	Advanced
200 - 278	279 - 299	300 - 328	329 - 399

Demo Student 1's Performance Level: **PROFICIENT**

Demo Student 1's OPI score falls in the Proficient range indicating readiness for the next grade or course. More information on each performance level can be found at the bottom of this page.

Demo's Quantile Score is **1045Q.**

The Quantile measure provides a score that describes your student's level of mathematical ability and the difficulty of a skill or concept as it relates to other mathematical skills and concepts your student is learning. The score shows your student's readiness for instruction regarding a particular mathematical skill or concept. For more information on Quantile measures, please visit: http://sde.ok.gov/sde/quantiles

eMetric

The Performance Level describes what your student is likely to know and be able to do based on their performance on the state test. Your student may also be able to demonstrate some of what is described in the next level. Click on the tabs to transition through descriptions.

OKLAHOMA SCHOOL TESTING PROGRAM

Parent/Student Portal

Performance Level Descriptors

The Performance Level describes what your student is likely to know and be able to do based on their performance on the state test. Your student may also be able to demonstrate some of what is described in the next level.

Below Basic	Basic	Proficient	Advanced

Students scoring at the Proficient level:

- estimate solutions of problems involving rational numbers and assess the reasonableness of the solutions.
- differentiate between proportional and inversely proportional relationships and identify the constant of proportionality.
- represent proportional relationships in a variety of ways.
- use representations to identify and compare unit rates.
- solve problems involving proportional relationships and assess the reasonableness of solutions.
- represent, solve and write equations.

eMetric

Reading Sufficiency Act (RSA) has been added to 3rd Grade ELA test results. You can see if your student meets the reading requirement for promotion to the 4th grade. Click on the link for more information about RSA.

Demo Student 2's Performance Level: **BASIC**

Demo Student 2's OPI score falls in the Basic range indicating that they have foundational skills and abilities but are still working toward being ready for the next grade or course and may need additional support. More information on each performance level can be found at the bottom of this page.

Your student HAS MET the Reading Sufficiency Act (RSA) criteria based on Standard 2.0 (Reading and Writing Process) and 4.0 (Vocabulary) and is eligible for automatic promotion to 4th grade. For more information about RSA, please visit:

https://sde.ok.gov/parents-reading-sufficiency.

eMetric

At the bottom of your student's detailed test results, you will find guidance on how to use this report for meeting with your student's teacher or school. A link is also provided for additional resources and supports available to you.

Use your browser's functionality to print any of the pages within the Parent/Student Portal.

Using this Report to Meet with Your Student's Teacher or School

As your student's first teacher, you are a critical part of their education. It is important to remember that your student's strengths, abilities and potential cannot be measured by a single test score. Each student grows at different rates both physically and academically. State tests help gauge how your student is growing in the knowledge and skills outlined in the Oklahoma Academic Standards. State test results, when combined with other information (i.e. report card grades, teacher feedback, classroom performance and local tests) can help you and the teacher understand where your student is making progress and where they may need extra support. Ask your student's teachers and/or school:

- Where do you think my student is excelling? What can I do to support their success?
- What do you think is giving my student the most trouble? How can I help my student improve in this area?
- What can I do to help my student with upcoming work?
- What learning experiences and opportunities do you provide to support my student's growth?

For additional Supports and Resources, please visit:
