

HIGH SCHOOL GRADUATION REQUIREMENTS

- A. The board shall award a high school diploma to every student enrolled in the district who meets the requirements of graduation established by the district. Only one diploma shall be awarded with no distinctions being made between the various programs of instruction which may have been pursued.

The board shall establish graduation requirements which, as a minimum, satisfy those established by the State Board of Education:

	Class of 2012 and beyond
English (reading, writing and communications)	4 credits
Mathematics (Algebra 1 and higher are required)	3 credits
Science (physical, life and earth; one laboratory credit)	2 credits
Social Studies (civics, history and geography)	3 credits
Health and Fitness	2.5 credits
Arts	1 credit
Occupational Education	2 credit
Electives	<u>5.5 credits</u>
TOTAL:	23 credits

In addition to the minimum credit requirements, to earn a diploma each student must:

1. Pass the reading and writing portions of the statewide assessment;
2. Complete a High School and Beyond Plan: Within the first year of high school enrollment, each student shall develop a plan for satisfying the state and district's high school graduation requirements and for their first year after high school completion. The plan should be developed in collaboration with the student, parent and district staff. The plan should include how the student will satisfy the district's academic credit requirements, preparation for successfully completing the statewide assessment, a description of the student's culminating project and the student's goals for the year following graduation. Each student plan should be reviewed annually at the beginning of the school year to assess student progress, to adjust the plan, and to advise the student on steps necessary for successful completion of the plan;
3. Complete a Culminating Project consisting of a research paper, Presentation and Portfolio: During the course of their high school career each student shall complete a culminating project. The project shall demonstrate the student's ability to think analytically, logically and creatively and to integrate experience and knowledge to form reasoned judgments and solve problems. The project will also have a connection to the world of work in that it will demonstrate that the student understands the importance of work and how performance, effort, and decisions directly affect future career and educational opportunities;
4. Complete math requirements: Students in the Class of 2013 and 2014 one end of course assessment (either Algebra1 or Geometry or their intergrated math equivalents) or state-approved alternatives. Students in the classes of 2015 and beyond must pass two end of course assessments (Algebra I and Geometry or their integrated math equivalents) or state-approved alternative.
5. Complete science requirements: Students in the class of 2015 and beyond must pass the biology end-of-course assessment or an state-approved alternative.

B. Students, in the Class of 2013 and beyond, must complete mathematics courses in one of the following progressive sequences.

- a. Algebra I, Geometry, and Algebra II; or
- b. Integrated Mathematics I, Integrated Mathematics II, and Integrated Mathematics III; or
- c. Any combination of (a) and (b) in progressive sequence.
- d. Algebra 1 credit will be awarded to middle school students upon successfully meeting course requirements and passing the state, end of course assessment.

In lieu of a third credit of mathematics students may choose an alternative mathematics course, if the parent/guardian agrees that the third credit mathematics elective is supportive of the student's education and career goals. Before approval of the elective third mathematics credit a meeting will be held with the student, the parent/guardian and the school staff to discuss the student's High School and Beyond Plan and the mathematics requirements for post-secondary and career choices.

The district will obtain a signed consent from the parent for the student to enroll in the alternative third credit of mathematics. The consent form will confirm the meeting, that the parent understands the impact of the selection on the student's educational and employment options, and that the alternative is most appropriate for the needs of the student.

Students may also satisfy the mathematics requirements by earning equivalency based credit in career and technical education mathematics courses. Those credits must be recorded using the equivalent academic high school department designation.

C. A student will receive a certificate of academic achievement only if they earn the appropriate number of credits required by the district, complete a culminating project, complete the high school and beyond plan; and meet the reading, writing and math standards on the high school statewide assessment or an appropriate alternative assessment.

Students qualifying for special education services will earn a certificate of individual achievement as determined by their individual education plan.

D. High school credit will be awarded for successful completion of a specified unit of study. In this district, successful completion of a specified unit of study means:

1. Earning a passing grade according to the district's grading policy; and/or
2. Demonstrating proficiency/mastery of content standards as determined by the district; and/or
3. Successfully completing an established number of hours of planned instructional activities to be determined by the district.

The district will establish a process for determining proficiency/mastery for credit-bearing courses of study.

E. The superintendent or designee shall develop procedures for implementing this policy which include:

1. Establishment of the process and assessment criteria for the high school culminating project requirements; and determination of the education plan process for identifying competencies.
2. Establishing the process for completion of the High School and Beyond Plan.
3. Recommending course and credit requirements which satisfy the State Board of Education requirements and recognize the expectations of the citizens of the district.

4. Determining which courses satisfy particular subject area requirements and whether a particular course may satisfy more than one subject area requirement including a process for determining the credits the district will recognize for courses taken through another program recognized by the state (another public school district, an approved private school) or those courses taken by students moving into the state from another state or country. Decisions regarding the recognition of credits earned before enrolling in the district will be based on the professional judgment of the high school principal or designee based on an evaluation of the student's former program and demonstrated knowledge and skills in the discipline for which credit is sought. The decision of the principal may be appealed to the superintendent within fifteen school days.
5. Making graduation requirements available in writing to students, parents and members of the public.
6. Providing for a waiver of graduation requirements for an individual student when permitted. All state graduation requirements must be satisfied unless a waiver is permitted by law;
7. Granting credit for learning experiences conducted away from school, including National Guard high school career training.
8. Granting credit for correspondence, vocational-technical institutes and/or college courses for college or university course work the district has agreed to accept for high school credit, state law requires that the district award one high school credit for every five quarter hour credit or three semester hour credit successfully earned through a college or university, except for community college high school completion programs where the district awards the diploma; tenth and eleventh grade students and their parents shall be notified annually of the Running Start Program.
9. Granting credit for work experience.
10. Granting credit based upon competence testing, in lieu of enrollment.
11. Granting credit for high school courses completed before a student attended high school, to the extent that the course work exceeded the requirements for seventh or eighth grade.
12. Counseling of students to know what is expected of them for completion of their schooling.
13. Preparing a list of all graduating students for the information of the board and release to the public.
14. Preparing suitable diplomas and final transcripts for graduating seniors.
15. Planning and executing graduation ceremonies.
16. Developing student learning plans for students who are not successful on one or more components of the statewide assessment.

In the event minimum test requirements are adopted by the board, a student who possesses a disability shall satisfy those competency requirements which are incorporated into the Individualized Education Program (IEP). Satisfactory completion of the objectives incorporated into the IEP shall serve as the basis for determining completion of a course.

A student shall be issued a diploma after completing the district's requirements for graduation. In lieu of the certificate of academic achievement, special education students may earn a certificate of individual achievement. A student shall also be advised that he/she may receive a final transcript.

However, a student's diploma or transcript may be withheld until the student pays for any school property that has been lost or willfully damaged. Upon payment for damages, or the equivalency through voluntary work, the diploma or transcript will be released. When the damages or fines do not exceed \$100, the student or his/her parents shall have the right to an appeal using the same process as used for short-term suspension as defined in Policy 3241, *Classroom Management, Corrective Actions or Punishments*. When damages are in excess of

\$100, the appeal process for long term suspension as defined in Policy 3241, *Classroom Management, Corrective Actions or Punishments* shall apply.

Graduation requirements in effect when a student first enrolls in high school shall be in effect until that student graduates unless such period is in excess of twenty-first (21st) birthday.

In the event that other forms of corrective actions are imposed for violations of school rules, the student may be denied participation in graduation ceremonies. Such exclusion shall be regarded as a school suspension. In such instances, the diploma will be granted.

Loss of Credit

In order to fulfill the credit requirements for a class, a student must be in attendance eighty-one (81) days of the ninety (90) day semester with the exception of school-sponsored activities (interscholastic athletic, field trips, etc.) and suspension days. Students who have accumulated more than nine (9) absences will not receive credit for the class unless they have proven that there have been extenuating circumstances which have caused their absences. Any student who is absent more than 9 days will not receive credit for class unless this action is modified subsequent to an appeal. High school teachers shall advise students of this standard at the onset of each semester.
