## Answer Key

## Lesson 4.3

## **Challenge Practice**

1.

Statements	Reasons
1. $\overline{PA} \cong \overline{PC}$	1. Given
$\overline{AB} \cong \overline{BC}$	
<b>2.</b> $\overline{PB} \cong \overline{PB}$	2. Reflexive property
<b>3.</b> $\triangle PAB \cong \triangle PBC$	of congruence 3. SSS Congruence
3. \(\text{ZIMD} = \text{ZI BC}\)	Postulate
2.	
Statements	Reasons
1. $\overline{AD} \cong \overline{CF}$	1. Given
$\overline{DC} \cong \overline{FA}$	
<b>2.</b> $\overline{AC} \cong \overline{AC}$	<b>2.</b> Reflexive property
• • • • • • • • • • • • • • • • • • • •	of congruence
$3. \triangle ADC \cong \triangle CFA$	3. SSS Congruence
2	Postulate
<b>3.</b> Statements	Reasons
$\overline{1. \ \overline{AE} \cong \overline{FC}}$	1. Given
$\overrightarrow{BE} \cong \overrightarrow{BF}$	1. Given
$\frac{BE}{AB} \cong \frac{BI}{BC}$	
2. AE + EF = AF	2. Segment Addition
EF + FC = EC	Postulate
3. FC + EF = AF	<b>3.</b> Substitution property
	of equality
4. $AF = EC$	<b>4.</b> Substitution property of equality
5. $\overline{AF} \cong \overline{EC}$	<b>5.</b> Definition of
<b>6.</b> $\triangle AFB \cong \triangle CEB$	<ul><li>congruent segments</li><li>6. SSS Congruence</li></ul>
$0. \ \triangle APD = \triangle CED$	Postulate
4.	Tostulate
Statements	Reasons
<b>1.</b> $\triangle ZWV \cong \triangle YXV$	1. Given
<b>2.</b> $\overline{ZW} \cong \overline{YX}$	<b>2.</b> Definition of
$\overline{ZV} \cong \overline{YV}$	congruent triangles
$WV \cong \overline{XV}$	
3. $WV + VY = WY$	3. Segment Addition
XV + VZ = XZ <b>4.</b> $XV + VZ = WY$	Postulate  4. Substitution property of aquality
<b>4.</b> $XV + VZ = WY$ <b>5.</b> $WY = XZ$	<ul><li>4. Substitution property of equality</li><li>5. Substitution property of equality</li></ul>
6. $\overline{WY} \cong \overline{XZ}$	<b>6.</b> Definition of
	congruent segments
7. $\triangle ZWY \cong \triangle YXZ$	7. SSS Congruence Postulate

## Answer Key

**5.** The diagram shows two equilateral triangles,  $\triangle ABC$  and  $\triangle DEF$ . If one side of  $\triangle ABC$  is congruent to one side of  $\triangle DEF$ , such as  $\overline{AB} \cong \overline{DE}$ , then you know that the triangles are congruent because equilateral triangles have three congruent sides.

**6.** *J*(3, 9), *K*(7, 8)
