## Answer Key

#### Lesson 4.5

#### **Practice Level C**

- **1.**  $\overline{FE} \cong \overline{TR}$  or  $\overline{DE} \cong \overline{QR}$  **2.**  $\angle F \cong \angle T$
- **3.**  $\overline{DF} \cong \overline{QT}$  **4.** No **5.** Yes;  $\angle KNL \cong \angle MLN$  by Alternate Interior Angles Theorem,  $\overline{LN} \cong \overline{LN}$  by Reflexive Property of Congruence,  $\triangle KLN \cong \triangle MNL$  by ASA Congruence Postulate
- **6.** Yes;  $\overline{TX} \cong \overline{VY}$  by summation of congruent parts,  $\overline{YX} \cong \overline{YX}$  by Reflexive Property of Congruence,  $\overline{YZ} \cong \overline{YW}$  by summation of congruent parts,  $\triangle TXZ \cong \triangle VYW$  by SAS Congruence Theorem
- **7.** No,  $\angle M$  and  $\angle Y$  are not corresponding angles.
- **8.** No,  $\overline{JR}$  and  $\overline{YZ}$  are not corresponding sides.
- **9.** Yes, AAS Congruence Theorem **10.** No, the congruent sides are not corresponding sides.
- **11.** Two pairs of corresponding sides  $(\overline{AF} \cong \overline{BF}, \overline{FD} \cong \overline{FC})$  and the corresponding included angle  $(\angle AFD \cong \angle BFC)$ , by Vertical Angles Theorem) are congruent.
- **12.** Two pairs of corresponding angles ( $\angle ACE \cong \angle DBA$ ,  $\angle AEC \cong \angle DAB$ ) and the a corresponding non-included side ( $\overline{AC} \cong \overline{DB}$ , by summation of congruent parts) are congruent.
- **13.**  $\angle ACD \cong \angle ABD$  is given.  $\angle BDC \cong \angle ABD$  by Alternate Interior Angles Theorem.  $\angle ACD \cong \angle BDC$  by Transitive Property of Congruence.  $\overline{DC} \cong \overline{DC}$  by Reflexive Property of Congruence.  $\angle ADF \cong \angle BCF$  because  $\triangle ADF \cong \triangle BCF$  by SAS Congruence Theorem. Then  $\angle ADC \cong \angle BCD$  by summation of congruent parts.

| Statements                                    | Reasons                                    |
|---|--|
| 1. $\overline{AB} \parallel \overline{DC}$    | 1. Given                                   |
| <b>2.</b> $\angle ADB \cong \angle CBD$       | 2. Given                                   |
| 3. $\angle ABD \cong \angle CDB$              | 3. Alternate Interior Angles Theorem       |
| <b>4.</b> $\overline{DB} \cong \overline{DB}$ | <b>4.</b> Reflexive Property of Congruence |
| <b>5.</b> $\triangle ABD \cong \triangle CDB$ | <b>5.</b> ASA Congruence Postulate         |

- **15.** 1. Given; **2.** Given; **3.** Reflexive Property of Congruence; **4.** AAS Congruence Theorem;
- 5. Corresponding parts of congruent triangles are congruent; 6. Alternate Interior Angles Theorem
- **16.** 1. Given; **2.** Given; **3.** Vertical Angles Theorem; **4.** ASA Congruence Postulate; **5.** Corresponding parts of congruent triangles are congruent.

| Statements                                     | Reasons  |
|--|--|
| <b>1.</b> $\angle MJL \cong \angle KJL$        | 1. Given   |
| <b>2.</b> $\angle MLJ \cong \angle KLJ$        | 2. Given   |
| 3. $\overline{JL}\cong \overline{JL}$          | 3. Reflexive Property of Congruence  |
| <b>4.</b> $\triangle MJL \cong \triangle KJL$  | 4. ASA Congruence Postulate  |
| <b>5.</b> $\overline{LN}\cong\overline{LN}$    | 5. Reflexive Property of Congruence  |
| <b>6.</b> $\overline{ML} \cong \overline{KL}$  | <b>6.</b> Corresponding parts of congruent triangles are congruent.                          |
| 7. $m \angle MLJ +$                            | 7. Linear Pair Postulate   |
| $m \angle MLN = 180^{\circ}$                   |  |
| <b>8.</b> $\angle MLJ$ and $\angle MLN$        | 8. Definition of   |
| are supplementary.                             | supplementary angles   |
| <b>9.</b> <i>m</i> ∠ <i>KLJ</i> +              | 9. Linear Pair Postulate   |
| $m \angle KLN = 180^{\circ}$                   |  |
| <b>10.</b> $\angle KLJ$ and $\angle KLN$       | <b>10.</b> Definition of   |
| are supplementary.                             | supplementary angles   |
| <b>11.</b> $\angle MLN \cong \angle KLN$       | 11. Because  |
|  | $\angle MLJ \cong \angle KLJ$ , if two angles are supplementary to the same angle, then they |
| 4. 4.16737 4.77737                             | are congruent.   |
| <b>12.</b> $\triangle MLN \cong \triangle KLN$ | 12. SAS Congruence Theorem   |
|  |  |
|  |  |
