

PROGRESS REPORT 10

April 21—Still didn't go into the factory. I told Mrs. Flynn my landlady to call and tell Mr. Donnegan I was sick. Mrs. Flynn looks at me very funny lately like she's scared of me.

93

I think it's a good thing about finding out how everybody laughs at me. I thought about it a lot. It's because I'm so dumb and I don't even know when I'm doing something dumb. People think it's funny when a dumb person can't do things the same way they can.

94

Anyway, now I know I'm getting smarter every day. I know punctuation and I can spell good. I like to look up all the hard words in the dictionary and I remember them. I'm reading a lot now, and Miss Kin-than says I read very fast. Sometimes I even understand what I'm reading about, and it stays in my mind. There are times when I can close my eyes and think of a page and it all comes back like a picture.

95

Besides history, geography, and arithmetic, Miss Kinnian said I should start to learn a few foreign languages. Dr. Strauss gave me some more tapes to play while I sleep. I still don't understand how that conscious and unconscious mind works, but Dr. Strauss says not to worry yet. He asked me to promise that when I start learning college subjects next week I wouldn't read any books on psychology—that is, until he gives me permission.

96

I feel a lot better today, but I guess I'm still a little angry that all the time people were laughing and making fun of me because I wasn't so smart. When I become intelligent like Dr. Strauss says, with three times my 1.0. of 68, then maybe I'll be like everyone else and people will like me and be friendly.

I'm not sure what an I.Q. is. Dr. Nemur said it was something that measured how intelligent you were—like a scale in the drugstore weighs pounds. But Dr. Strauss had a big argument with him and said an I.Q. didn't weigh intelligence at all. He said an I.Q. showed how much intelligence you could get, like the numbers on the outside of a measuring cup. You still had to fill the cup up with stuff.

Then when I asked Burt, who gives me my intelligence tests and works with Algernon, he said that both of them were wrong (only I had to promise not to tell them he said so). Burt says that the I.Q. measures a lot of different things including some of the things you learned already, and it really isn't any good at all.

99

So I still don't know what 1.0. is except that mine is going to be over 200 soon. I didn't want to say anything, but I don't see how if they don't know *what* it is, or *where* it is—I don't see how they know *how much* of it you've got.

100

Dr. Nemur says I have to take a *Rorschach Test* tomorrow. I wonder what *that* is.

101

April 22—I found out what a *Rorschach* is. It's the test I took before the operation—the one with the inkblots on the pieces of cardboard. The man who gave me the test was the same one.

102

I was scared to death of those inkblots. I knew he was going to ask me to find the pictures and I knew I wouldn't be able to. I was thinking to myself, if only there was some way of knowing what kind of pictures were hidden there. Maybe there weren't any pictures at all. Maybe it was just a trick to see if I was dumb enough to look for something that wasn't there. Just thinking about that made me sore at him.

103

"All right, Charlie," he said, "you've seen these cards before remember?"

104

"Of course I remember."

105

The way I said it, he knew I was angry, and he looked surprised. "Yes, of course. Now I want you to look at this one. What might this be? What do you see on this card? People see all sorts of things in these inkblots. Tell me what it might be for you—what it makes you think of."

I was shocked. That wasn't what I had expected him to say at all. "You mean there are no pictures hidden in those inkblots?"

He frowned and took off his glasses. “What?”

“Pictures. Hidden in the inkblots. Last time you told me that everyone could see them and you wanted me to find them too.”

109

He explained to me that the last time he had used almost the exact same words he was using now. I didn’t believe it, and I still have the suspicion that he misled me at the time just for the fun of it. Unless—I don’t know any more—could I have been *that* feeble-minded?

110

We went through the cards slowly. One of them looked like a pair of bats tugging at something. Another one looked like two men fencing with swords. I imagined all sorts of things. I guess I got carried away. But I didn’t trust him any more, and I kept turning them around and even looking on the back to see if there was anything there I was supposed to catch. While he was making his notes, I peeked out of the corner of my eye to read it. But it was all in code that looked like this:

WF+A DdF-Ad orig. WF-A SF+obj

The test still doesn’t make sense to me. It seems to me that anyone could make up lies about things that they didn’t really see. How could he know I wasn’t making a fool of him by mentioning things that I didn’t really imagine? Maybe I’ll understand it when Dr. Strauss lets me read up on psychology.

April 25—I figured out a new way to line up the machines in the factory, and Mr. Donnegan says it will save him ten thousand dollars a year in labor and increased production. He gave me a twenty-five-dollar bonus.

I wanted to take Joe Carp and Frank Reilly out to lunch to celebrate, but Joe said he had to buy some things for his wife, and Frank said he was meeting his cousin for lunch. I guess it’ll take a little time for them to get used to the changes in me. Everybody seems to be frightened of me. When I went over to Amos Borg and tapped him on the shoulder, he jumped up in the air.

People don’t talk to me much any more or kid around the way they used to. It makes the job kind of lonely.

April 27—I got up the nerve today to ask Miss Kinnian to have dinner with me tomorrow night to celebrate my bonus.

At first she wasn't sure it was right, but I asked Dr. Strauss and he said it was okay. Dr. Strauss and Dr. Nemur don't seem to be getting along so well. They're arguing all the time. This evening when I came in to ask Dr. Strauss about having dinner with Miss Kinnian, I heard them shouting. Dr. Nemur was saying that it was *his* experiment and *his* research, and Dr. Strauss was shouting back that he contributed just as much, because he found me through Miss Kinnian and he performed the operation. Dr. Strauss said that someday thousands of neurosurgeons might be using his technique all over the world.

118

Dr. Nemur wanted to publish the results of the experiment at the end of this month. Dr. Strauss wanted to wait a while longer to be sure. Dr. Strauss said that Dr. Nemur was more interested in the Chair of psychology at Princeton than he was in the experiment. Dr. Nemur said that Dr. Strauss was nothing but an opportunist who was trying to ride to glory on *his* coattails.

119

When I left afterwards, I found myself trembling. I don't know why for sure, but it was as if I'd seen both men clearly for the first time. I remember hearing Burt say that Dr. Nemur had a shrew of a wife who was pushing him all the time to get things published so that he could become famous. Burt said that the dream of her life was to have a big-shot husband.

120

Was Dr. Strauss really trying to ride on his coattails?

121

April 28—I don't understand why I never noticed how beautiful Miss Kinnian really is. She has brown eyes and feathery brown hair that comes to the top of her neck. She's only thirty-four! I think from the beginning I had the feeling that she was an unreachable genius—and very, very old. Now, every time I see her she grows younger and more lovely.

We had dinner and a long talk. When she said that I was coming along so fast that soon I'd be leaving her behind, I laughed.

123

“It’s true, Charlie. You’re already a better reader than I am. You can read a whole page at a glance while I can take in only a few lines at a time. And you remember every single thing you read. I’m lucky if I can recall the main thoughts and the general meaning.”

124

“I don’t feel intelligent. There are so many things I don’t understand.”

125

She took out a cigarette and I lit it for her. “You’ve got to be a *little* patient. You’re accomplishing in days and weeks what it takes normal people to do in half a lifetime. That’s what makes it so amazing. You’re like a giant sponge now, soaking things in. Facts, figures, general knowledge. And soon you’ll begin to connect them, too. You’ll see how the different branches of learning are related. There are many levels, Charlie, like steps on a giant ladder that take you up higher and higher to see more and more of the world around you.

126

“I can see only a little bit of that, Charlie, and I won’t go much higher than I am now, but you’ll keep climbing up and up, and see more and more, and each step will open new worlds that you never even knew existed.” She frowned. “I hope. . . I just hope to God—”

127

“What?”

128

“Never mind, Charles. I just hope I wasn’t wrong to advise you to go into this in the first place.”

129

I laughed. “How could that be? It worked, didn’t it? Even Algernon is still smart.”

130

We sat there silently for a while and I knew what she was thinking about as she watched me toying with the chain of my rabbit’s foot and my keys. I didn’t want to think of that possibility any more than elderly people want to think of death. I *knew* that this was only the beginning. I knew what she meant about levels because I’d seen some of them already. The thought of leaving her behind made me sad.

131

I’m in love with Miss Kinnian.

Keyes uses dramatic irony to emphasize the point of the novel.

Explain how each of the following are ironic

“Dr. Nemer says I have to take a Rorschach Test tomorrow. I wonder what that is?”

“...I guess I’m still angry that all the time people were laughing and making fun of me because I wasn’t so smart. When I became more intelligent like Dr. Strauss says, with three times my IQ of 68, then maybe I’ll be like everyone else and people will like me,”

“People don’t talk to me much any more or kid around the way they used to. It makes the job kind of lonely.”

Consider the three doctors: [Victor](#), Dr. Strauss, and Dr. Nemur

Of the three doctors, who has the most honorable intentions? Cite the incident or lines of dialogue that are most revealing as to each character's intentions.

[Victor](#)

Dr. Strauss

Dr. Nemur

Collaborative Discussion

How would “Flowers for Algernon” be different if it were told from the point of view of Dr. Strauss, Dr. Nemur, or Mrs. Kinnian? Cite textual evidence to support your analysis.
