7th Grade Subject Spotlight

Science:

Students in Science will begin investigating the dynamic Earth, including the causes and the destruction of volcanoes and earthquakes, during the month of January.

English Language Arts:

In January, students will complete an argumentative essay. Students will learn how to support claims with strong reasoning and evidence. Analysis of various genres will take place through discussion and in written responses.

Social Studies:

Students will be finishing up our unit on Ancient Greece and continuing on with Ancient Rome. We will explore aspects of Roman culture including art and architecture. Students will simulate the Roman Republic and compare it to our style of government in the modern US.

Spanish:

Un Año Nuevo!!! A new year!! We will begin by delving into the rich history of Mexican culture and geography. Students will then begin to learn about the process of telling time (La Hora) in Spanish.

Mathematics:

We will be working to add and subtract linear expressions in Course 2. Seventh grade students in Pre-Algebra will begin exploring Linear Relationships and functions and well as nonlinear functions when we return in January.
