7th Grade Subject Spotlight

Mathematics:

In seventh grade Mathematics we will continue work on systems of equations. We will work to simplify one and two step equations. We will also be learning about inequalities.

English Language Arts:

Poetry is not only fun to read but also fun to write. Some poems are very formal, and others are more playful. Some rhyme, and some don't. In March we'll analyze and write amazing poetry!

Social Studies:

We will be wrapping up learning about Islamic civilizations and moving on to learn about African civilizations including Ghana, Mali, Aksum, Zimbabwe, and Kongo. A main focus of our studies will be on the advancement of trade in Africa.

Science:

Students in Science will learn about Energy. Students will investigate different forms of energy, energy transformations, and how resources are used for energy.

STEAM:

Students in STEAM 7 are currently rotating through Robotics Stations. They are able to try out many new and exciting pieces of equipment and technology. Not only are students building and programming their own robots, but they are creating multimedia productions.
