

8th Grade Presentation

- Draw for a budget amount – Your name and budget amount should go on Slide 1
- Create a slide (research first) for each of the following
 - You must spend your entire budget
 - You must put an “amount spent” and “remaining balance” on each slide
 - You must copy & paste the URL of the website where you made purchases and place in the bottom right corner of each slide
- 1. Make a purchase for your entire family
- 2. Make a purchase for yourself
- 3. Make a purchase to feed 20 people (meal or snack)
- 4. Purchase 4 tickets to a theme park (clarify - day/multiple)
- 5. Purchase transportation (car, bicycle, skateboard, etc.)
- 6. Purchase a pair of athletic shoes for yourself (include store/website)
- 7. Donate 1/10 of your total to an organization
- 8. Purchase two concert tickets for you and a friend. (any where)
 - See a movie if you don't have enough money

Prioritize what is most important and make that purchase first. Your slides should go in order of priority. When complete, you should have 9 slides and a zero balance. Be very specific on each slide. (what did you eat? Where was the concert/movie? What section did you sit in? etc.) You may have to adjust your purchases many times to fit your budget.

Balance amounts:

\$500
\$500
\$750
\$750
\$1,000
\$1,000
\$1,200
\$1,200
\$4,000
