

# Match-It Challenge

## PHOTOGRAPHY

**Directions:** Match the definitions with the words to reveal the answer to unlock the lock.

|                                                            |                                                             |                                                                             |
|------------------------------------------------------------|-------------------------------------------------------------|-----------------------------------------------------------------------------|
| Imaginary grid over your photo.                            |                                                             | Lead your eye to a subject or through the photo                             |
| Backlighting is best for this element.                     | Get rid of distractions and focus attention on your subject | Use it to bring certain emotions from the viewer                            |
| Use elements in the photo to draw attention to the subject | Composing your photo either vertical or horizontal.         | Lighting from the side showing a 3-D image of your subject                  |
| Pay attention to what is going on behind your subject      |                                                             | Conveys mood and emotion. One of the most important art elements in photos. |
