Name:

FOSSIL FUELS + IMPACTS

FOSSIL FUELS -

- •
- _
- •
- •

Describe how coal is formed:

Describe how natural gas is formed:

COAL MINING

- 1. What are 3 ways mining has impacted the land in West Virginia?
- 2. What evidence do scientists have that show coal mining is affecting streams?
- 3. Should there be laws to protect the land from mining? Why or why not?
- 4. Beyond affecting the environment, how does coal mining ultimately affect climate change?

FRACKING

- 1. What is fracking?
- 2. How does fracking impact the environment?

EVIDENCE OF ENVIRONMENTAL IMPACTS

At each station, choose 3 facts /pieces of evidence you learned about the fossil fuels. Then explain your reasoning for why this piece of evidence proves that this energy source is **harmful to the planet**.

Natural Gas	Oil	Coal
