

# a liquid

(has a definite volume not shape)

# a solvent

(dissolves other substances)

# transparent

(transmits light)

# tasteless

(has no taste)

# odorless

(has no odor)

# colorless

(has no color)

has

density

(has a certain ratio of mass to volume)

# viscosity

(flows at a certain rate)

# solubility

(dissolves in other substances)

# heat capacity

(absorbs heat)

# surface tension

(contracts its surface)

also it

evaporates

(slowly becomes a gas)

# boils

(rapidly becomes a gas)

# freezes

(becomes a solid)

and has many  
other properties
