

AM Therapeutics Summary
Abigale Haluska, Megan Jones, Joshua Breitsprecher

Company Origin

AM Therapeutics is a local startup based in Hobart, Indiana. At the beginning of our senior year at Hobart High School, we were asked to help define a problem that affects those in our community. This is when we discovered the impact that arthritis has on our community. After witnessing our loved ones, community members, and friends suffer from arthritis, we knew we had to make a difference.

Our solution? The Remedy Glove. The Remedy Glove is an affordable therapeutic glove that can be worn while users complete their daily tasks. This glove provides heat, vibration, and compression while remaining compact and mobile. Our company's goal is to provide remedy, relief, and renewal to those suffering from arthritis.
