

You need:

1. white drawing sheet
2. black marker
3. crayons or markers

Write your name with a black marker several times on a white sheet. Upside down, from the top to the bottom, it doesn't matter. Write your names disorderly, taking care the letters will mix up.

When your sheet is full enough, choose a couple of colours you like. Colour just the white spots who are completely surrounded by black lines. This might be small spots from the letters, but they could be tall as well because they are between the names.
