

Falcon's Fruit Stand Cost of Merchandise Sold

Objective:

This lesson is a way to teach the abstract concept of Cost of Merchandise Sold in a more concrete format.

Supplies Needed:

3 snack Ziploc bags for each group

4 oz. Box of Runtts for each group

Preliminary Planning:

Prior to the lesson, label and fill the bags as follows for each group-

January 1 Inventory Various Runtts-approx. 2/3 of the box

Purchases Various Runtts-approx. 1/3 of the box

Merchandise Sold Empty

Procedure:

Students move into groups of four and complete the work sheet below. The teacher facilitates each step as follows-

1. Give each group the January 1 inventory bag and have students count and calculate January 1 inventory.
2. Give each group a Purchases bag and have students count and calculate Purchases and Total Cost of Merchandise Available for Sale.
3. Have students put a handful of Runtts in the empty Merchandise Sold bag.
4. Have students count and calculate the remaining Runtts and record the December 31 Inventory.
5. Calculate Cost of Merchandise Sold
6. Count and calculate the Runtts in the Merchandise Sold bag to prove the accuracy of their work.
- 7.

Falcon's Fruit Stand Cost of Merchandise Sold									
<u>January 1 Inventory</u>									
	Apples		X	\$2	=				
	Oranges		X	\$3	=				
	Strawberries		X	\$5	=				
	Limes		X	\$1	=				
	Bananas		X	\$4	=				
				January 1 Inventory =			\$		

<u>Purchases</u>										
	Apples			X	\$2	=				
	Oranges			X	\$3	=				
	Strawberries			X	\$5	=				
	Limes			X	\$1	=				
	Bananas			X	\$4	=				
					+ Purchases					\$
Total Cost of Merchandise Available for Sale (Inventory + Purchases) = \$										
Falcon's Fruit Stand Cost of Merchandise Sold										
<u>December 31 Inventory</u>										
	Apples			X	\$2	=				
	Oranges			X	\$3	=				
	Strawberries			X	\$5	=				
	Limes			X	\$1	=				
	Bananas			X	\$4	=				
					- December 31 Inventory =					\$
Total Cost of Merchandise Available for Sale - December 31 Inventory = \$										
(This amount of the Cost of Merchandise Sold)
