

Finding Text Evidence

Find each piece of text evidence in the article and highlight OR underline it with the color specified.

For items 1-4, you'll be citing textual evidence to support what the text says explicitly.

1. Find the sentence that tells you how cowpox affected humans. Highlight it in **blue**.
2. Find the sentence that explains why Herophilus's work on human autopsies remained relevant for so long. Highlight it in **green**.
3. Find the sentence that explains the purpose of the Nuremberg Code and highlight it in **purple**.
4. Find the sentence that explains where the word *vaccine* came from. Highlight it in **gray**.

For items 5-8, you'll be citing one piece or multiple pieces of textual evidence to support inferences drawn from the text.

5. Find three pieces of evidence in the article that support the idea that some concentration camp prisoners endured horrific, unimaginable torture under the guise of medical research. Highlight them in **orange**.
6. Find two pieces of text evidence from the article that support the point that medical experimentation remained legal in the U.S. even after the Nuremberg Code was written. Highlight it in **yellow**.
7. Find one piece of text evidence that supports the idea that U.S. drug companies do not always follow U.S. regulations in regards to pharmaceutical testing. Highlight it in **pink**.
8. Find one detail from the article that supports this statement:
Human experiments in the U.S. today are subject to strict regulations. Highlight it in **red**.
