

**Dennis-Yarmouth Regional School District  
Administration Office  
OUTDOOR INTEGRATED PEST MANAGEMENT (IPM) PLAN  
296 Station Avenue  
Yarmouth, MA 02664**

---

**IPM Coordinator**

Steven Faucher

**Primary Contact**

Sandra J Cashen , 508-398-7670, [cashens@dy-regional.k12.ma.us](mailto:cashens@dy-regional.k12.ma.us)

Dennis-Yarmouth Regional School District Administration Office employs Steven A. Faucher an on-site certified and/or licensed pesticide applicator (certification/license #: 32715) who may be called on to manage all or some of the necessary OUTDOOR pest problems that may arise.

By signing the end of this outdoor IPM plan, the IPM coordinator, Steven Faucher, of this School and the Pest Management Professionals described above acknowledge, and agree to the terms of this OUTDOOR integrated pest management plan.

**A. INTRODUCTION**

In compliance with the Act Protecting Children and Families from Harmful Pesticides the Dennis-Yarmouth Regional School District Administration Office on 10/12/2018 10:31:00 AM has prepared the following outdoor IPM plan about pest control and pesticide use.

This plan describes the pest management practices for outdoor areas of Dennis-Yarmouth Regional School District Administration Office and clearly states it's pesticide use policies.

A copy of the plan has been filed with the Massachusetts Department of Agricultural Resources (MDAR), and at least one printed copy must be kept on site and made available to the public upon request.

By centralizing all of the Information about this facility's pest management practices the plan serves as a guide to direct this facility's IPM coordinator, Steven Faucher

**Objectives**

The objectives of the integrated pest management program conducted at the Dennis-Yarmouth Regional School District Administration Office are listed below.

- Reduce children's exposure to pesticides and pesticide residues whenever possible.
- Manage pests that may occur on facilities to prevent interference with the learning environment of the students.
- Provide the safest playing or athletic surfaces possible.

In light of these objectives, the Dennis-Yarmouth Regional School District Administration Office has selected the following as it's IPM policy statement.

**B.POLICY STATEMENT**

The Dennis/Yarmouth Regional School District desires to prevent unnecessary exposure to children and employees to chemical pesticides and reduce the need to rely on chemical pesticides when managing pests. It is the policy of the Dennis/Yarmouth Regional School District to only use chemical pesticides when pests have been identified and their presence verified. Selection of treatment option or corrective actions will give priority to non-chemical actions whenever possible to provide the desired control of pests. Education of staff, students, employees, and parents about IPM will be included to achieve desired objectives. When it is determined that pesticides are needed, only those allowed by the Children's and Families Protection Act will be used. Further, only certified and/or licensed individuals will be able to use pesticides. Our policy prohibits the use of any pesticide by unlicensed staff. It will be this school policy to make the appropriate notification and posting as well as keep records of all pesticide use. A copy of the school IPM plan will be maintained in the Asst. Superintendent's office and online at <http://www.dy-regional.k12.ma.us/district/facilities/pages/pest-management>.

**C. IPM COMMITTEE**

The tasks set before an IPM committee are to:

- Develop an IPM plan. The IPM plan is in essence, a document that describes the organization and implementation of IPM on school grounds.
- Evaluate progress of the IPM program.
- Communicate about IPM - Facilitate communication within the school about IPM practices.
- Assist in development of contract specifications.
- Provide notification to parents about pesticide use.

**The OUTDOOR committee members selected for the Dennis-Yarmouth Regional School District Administration Office are listed below:**

- 1) Steven Faucher (Outdoor IPM Coordinator)
- 2) Sandra Cashen
- 3) Steve Faucher

**D. COMMUNICATING IPM WITHIN THE FACILITY**

**Pest Management Personnel to Building Staff:**

IPM coordinator will meet directly with Asst. Facility Mgr. when necessary to cover monitoring reports. An initial meeting was held on December 1, 2013, to establish a pest activity log binder. The log binder will be kept online. The sheets will indicate an identification of pests (if known), number seen, date, time and location. The Asst. Facility Mgr. will be responsible for notifying the IPM Coordinator of logged pests seen on site. Asst. Facility Mgr. will respond to the logged complaints. If any sanitation or structural or operation changes are noted, it will be written in the report along with a remedial recommendation. Specific service reports will also be online that documents particular actions taken by Asst. Facility Mgr.

Staff/Students communicate with their supervisors who then pass information onto the IPM coordinator.

**E. EDUCATION AND TRAINING OF FACILITY OCCUPANTS & STAFF**

Staff, teachers and students will be instructed on how to log pest complaints and be given a brief overview on pest identification and the conditions that promote the pests. These training sessions will be approved by the IPM Committee. Pamphlets and fact sheets will be made available online. This information will focus on pest reduction strategies.

**F. OUTDOOR MONITORING**

The IPM plan will follow a Quarterly evaluation schedule. When pests are present, Dennis-Yarmouth Regional School District Administration Office has chosen an **OUTDOOR monitoring schedule that consists of Monthly inspections.** When pests are absent the **OUTDOOR monitoring schedule will consist of Monthly inspections.**

The following technique will be used to monitor for pests: The Asst. Facility Manager will conduct regular pest and would then instruct the IPM coordinator as to the proper course of action.

**G. COURSE OF ACTION TAKEN FOR OUTDOOR PESTS**

Outdoor property includes the turf, landscaping, and the outdoor grounds such as building exterior, playground equipment, etc.. Dennis-Yarmouth Regional School District Administration Office has prepared maps of the outdoor facility and identified the following priority areas for maintenance:

**Landscaping**

The Administration building has historically observed. 1. Pests 2. Weeds 3. Funguses 4. Wasps and Hornets 5. Mosquitoes The Grounds Foreman has historically observed at the Dennis /Yarmouth Regional School Administration building such pests as White Japanese Beetle Grubs and different varieties of Broad Leaf Weed Growth and Crabgrass. The pests have been identified as Japanese Beetle Grubs Wasps and Hornets ( Yellow Jackets). The presence of these pests occurs seasonally from late summer to early fall. The broadleaf growth such as Plantain, Purslane, Dandelion, Curly Dock, Clover, and Buckhorn appear throughout the growing season. The presence of these pests and broadleaf weeds have been seen and identified by the Asst. Facility Mgr.

**OutdoorGrounds**

Planting beds around the building

The following pests have historically and/or currently been a problem at Dennis-Yarmouth Regional School District Administration Office:

<b>TURF PESTS</b>	<b>LANDSCAPING AND PLANT PESTS</b>	<b>OUTDOOR GROUNDS PESTS</b>
	<b>Insects and Related Pests</b> Gypsy Moth	<b>Insects observed in and around outdoor grounds of school property.</b>
	<b>Weeds</b> Crabgrass	Mosquitoes & Flies Stinging Insects
	<b>Tree and Shrub Diseases</b> Blight	<b>Weeds</b> <b>Noxious weeds noticed on the school grounds</b>
	<b>Other</b> Bees, hornets, wasps.	Poison Ivy <b>Other</b>

LANDSCAPE MANAGEMENT PLAN

The following areas are priority areas for maintenance: The Administration building has historically observed. 1. Pests 2. Weeds 3. Funguses 4. Wasps and Hornets 5. Mosquitoes The Grounds Foreman has historically observed at the Dennis /Yarmouth Regional School Administration building such pests as White Japanese Beetle Grubs and different varieties of Broad Leaf Weed Growth and Crabgrass. The pests have been identified as Japanese Beetle Grubs Wasps and Hornets ( Yellow Jackets). The presence of these pests occurs seasonally from late summer to early fall. The broadleaf growth such as Plantain, Purslane, Dandelion, Curly Dock, Clover, and Buckhorn appear throughout the growing season. The presence of these pests and broadleaf weeds have been seen and identified by the Asst. Facility Mgr.

Cultural Practices

**Monitoring Program:**

Current controls have not been effective. The Asst. Facility Mgr. will monitor problem areas. The control of Wasps and Hornets has been somewhat successful by keeping barrels clean and emptied on a regular basis. We tried lids on field barrels but they disappear. Inspection of dumpsters and having them cleaned on a regular basis. Nests hanging from trees and buildings are disposed of by Waltham Chemical. Reports will be generated and sent to the IPM Coordinator.

**Soil Maintenance:**

None

**Fertilizer Use Practices:**

None

**Plant Care:**

Mulch

**Watering:**

None

**Tree and Shrub Diseases**

Blight

**Describe the monitoring technique you used for the pests above.**

Visual

**Provide information on how you diagnosed the pests above.**

Visual

**Provide details on the non-chemical control measures have you taken to manage the pests above.**

Physical removal

**If you use fungicides, describe your rationale for using them in for the pests above.**

None

**Describe or identify any alternative management or biological strategies being used or planned to be used**

None

**Insects and Related Pests**

Gypsy Moth

**Describe the monitoring technique you used for the pests above.**

Visual

**Provide information on how you identified the species of the pests above.**

Color, size, prior dealings with pest.

**Provide details on the non-chemical control measures you have taken to manage the pests above.**

Physical removal of nests. Mosquitoes: Personnel from Cape Cod Mosquito Control Project will monitor stagnant water, including catch basins, on a regular basis between April and October. When larval levels reach the action threshold, a category four larvicide will be used for treatment. No applications would be made while children were present on school property.

**If you use insecticides, describe your rationale for using them for the pests above.**

None

**Describe or identify any alternative management or biological strategies being used or planned to be used**

None

- Herbicide Use is documented in the **STANDARD WRITTEN NOTIFICATION FORM**.

OUTDOOR MANAGEMENT PLAN

The following areas are priority areas for maintenance: Planting beds around the building

Cultural Practices

**OUTDOOR GROUNDS GENERAL MANAGEMENT PRACTICES**

**Waste Disposal (trash containers and dumpsters):**

All waste containers are cleaned by Waste Contractor. Grounds department monitors barrel around administration building.

**Light Management:**

lighting is turned off after public hours

**Excess Water Prevention:**

drains are cleaned annually

**Noxious Weed Management:**

Physical removal

**Playgrounds (if applicable):**

non applicable

**Nuisance weeds in pavement:**

non applicable

**Storage Sheds (If applicable):**

non applicable

**Insects observed in and around outdoor grounds of school property.**

Mosquitoes & Flies

Stinging Insects

**Pests**

Mosquitoes & Flies

Stinging Insects

**Insects in playground area (if applicable)**

- Herbicide Use is documented in the **STANDARD WRITTEN NOTIFICATION FORM**.

**H. RECORD KEEPING**

In the case of Dennis-Yarmouth Regional School District Administration Office, OUTDOOR monitoring records will be maintained through: The use of forms which will be filled out by the person monitoring the facility

**I. EVALUATING THE PROGRAM**

The IPM plan will be evaluated on a Quarterly basis.

**J. NOTIFICATION REQUIREMENTS & EXEMPTIONS**

During the creation of this IPM plan, Sandra J Cashen has assigned committee member Steven Faucher with the responsibility of assembling and issuing all the documents that accompany the standard written notification whenever pesticides are applied outdoors.

**K. IN THE EVENT OF A HEALTH EMERGENCY**

During the creation of this IPM plan, Sandra J Cashen has assigned committee member Steven Faucher with the responsibility of applying for an emergency waiver.

**L. LIST OF PESTICIDES TO BE USED OUTSIDE THE FACILITY**

The following list includes all the pesticides that will be used outside Dennis-Yarmouth Regional School District Administration Office. This list includes all herbicides, fungicides, and insecticides that will be used in the event that chemical is required.

Pesticide Product Name	Active Ingredient	EPA Registration Number	Target Pest	Rationale for use
<b>Advion Ant Gel</b>	Indoxacarb	100-1498	ants	nuisance control

**M. WELL WATER SYSTEM**

The school does not have its own on site well water system.

I attest, to the best of my knowledge, that the above information is complete, accurate and true
