

AIL-MENTS

Let's combine learning with Christmas. Each student will create an ornament representing a different disorder in the body. You will use the terms we have learned and combine them to form an ailment. Example: (Acromegaly, Colostomy, Encephalitis, Melanoma, Cardiomegaly) We will then use the "Ail-ment" to decorate our "Anato-tree". Each student will make 2 Ail-ments.

Directions:

1. Each Ail-ment should be made out of cardboard or cardstock or an ornament (that you paint etc). They should be real pictures or depictions of the disorder.
2. The ail-ment needs to be approximately 6x6 in size.
3. The attached paper needs to be turned in with your ail-ment.
