

# Photo Alphabet- Summative Description

- Students will take 26 photos or make 26 drawings/arrangements resembling or referencing all of the letters of the alphabet
- Students may reference a letter by photographing things that relate to it without actually depicting it, BUT they must stay conceptually consistent, either reference or resemble the letter, don't mix the two - try to create a similar “font” - unity.
- Students may photograph anything that resembles a letter, or can be cropped to form a letter, there are no repeats allowed, and no photographs of actual existing letters will be allowed, students may create their letters out of drawings of objects.
- Students must then take all 26 photos and edit and stitch them together in google slides or try photoshop if possible. (create one image of the whole alphabet and then put letters together to make your name and then a name of a loved one)  
one document/slide per a word.
- The objective of this lesson is to observe, map, collect, and create successful photos/representations of objects resembling the letters of the alphabet.

# Photo Alphabet- MAKE SURE

1. The Letter should fill the frame, avoid cropping.
2. Vertical or Horizontal - Keep the photo composition the same orientation (vertical or horizontal).
3. Pay attention to **Backgrounds**- keep it simple and uncluttered. avoid confusion.
4. Stay focused: if possible try different lens, apertures and depth of fields.
5. Lighting is always important! Create and adjust your lighting situation as needed.
6. Create one document/slide with your whole alphabet and then create one with your name

- Any object, building, person, or arrangement of objects can be used
- **Challenge yourself to not use signage, existing letters, ads, billboards, or letters people have written** even though those examples are on the following slides

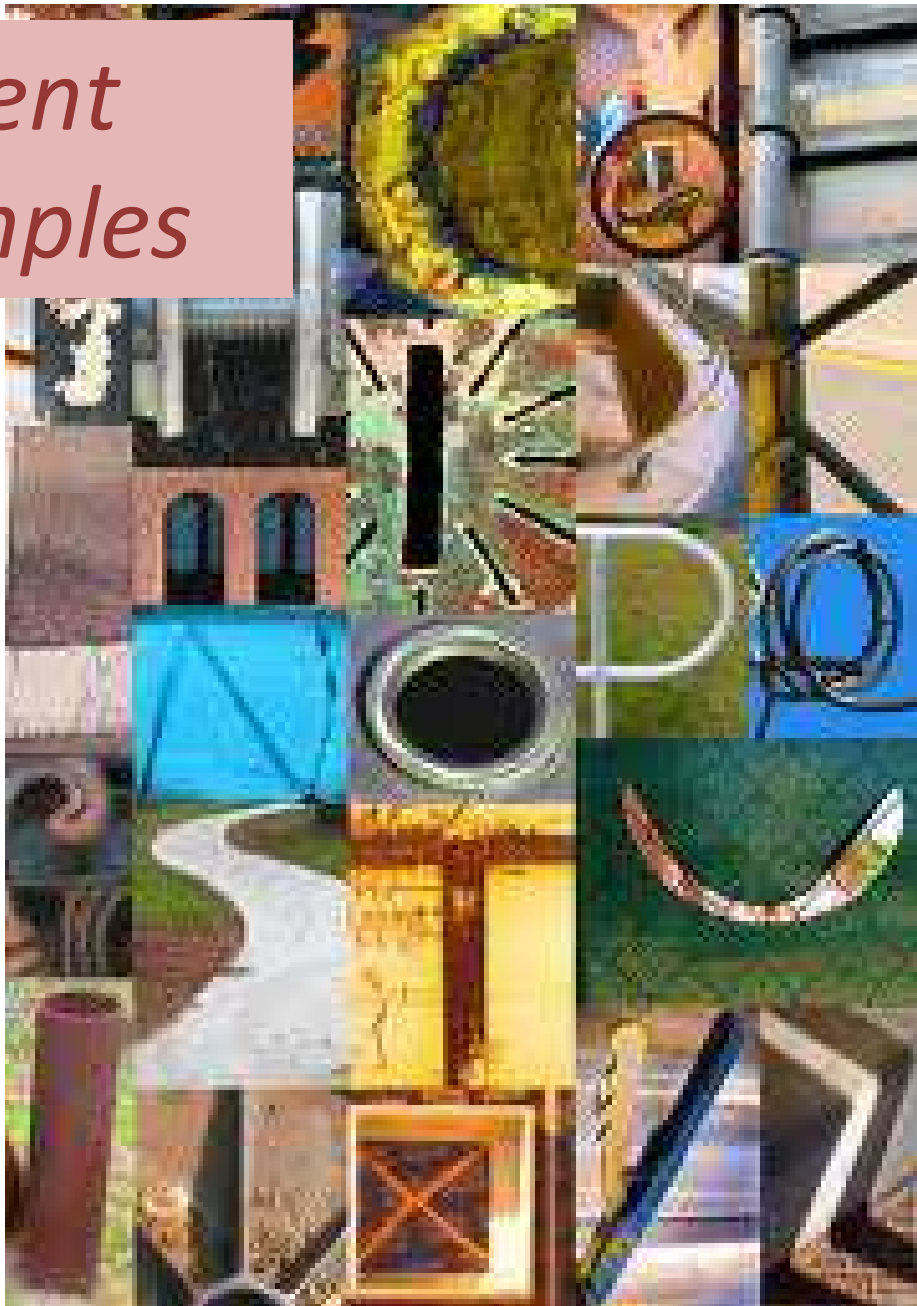

# *Student examples*

Notice they're a mix of found objects, printed letters, and arranged objects. Not thematically or conceptually consistent.

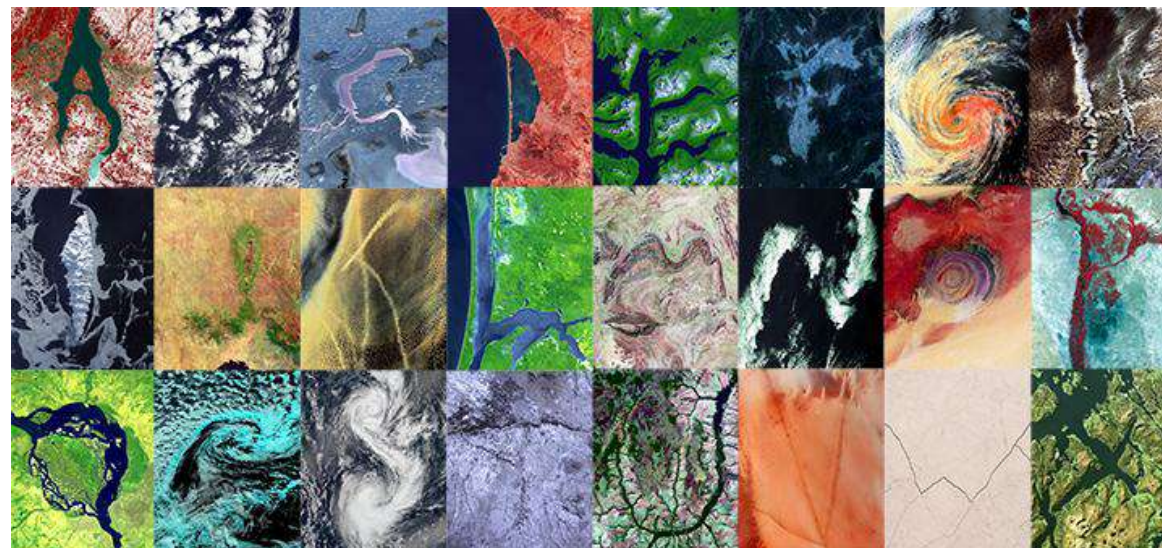

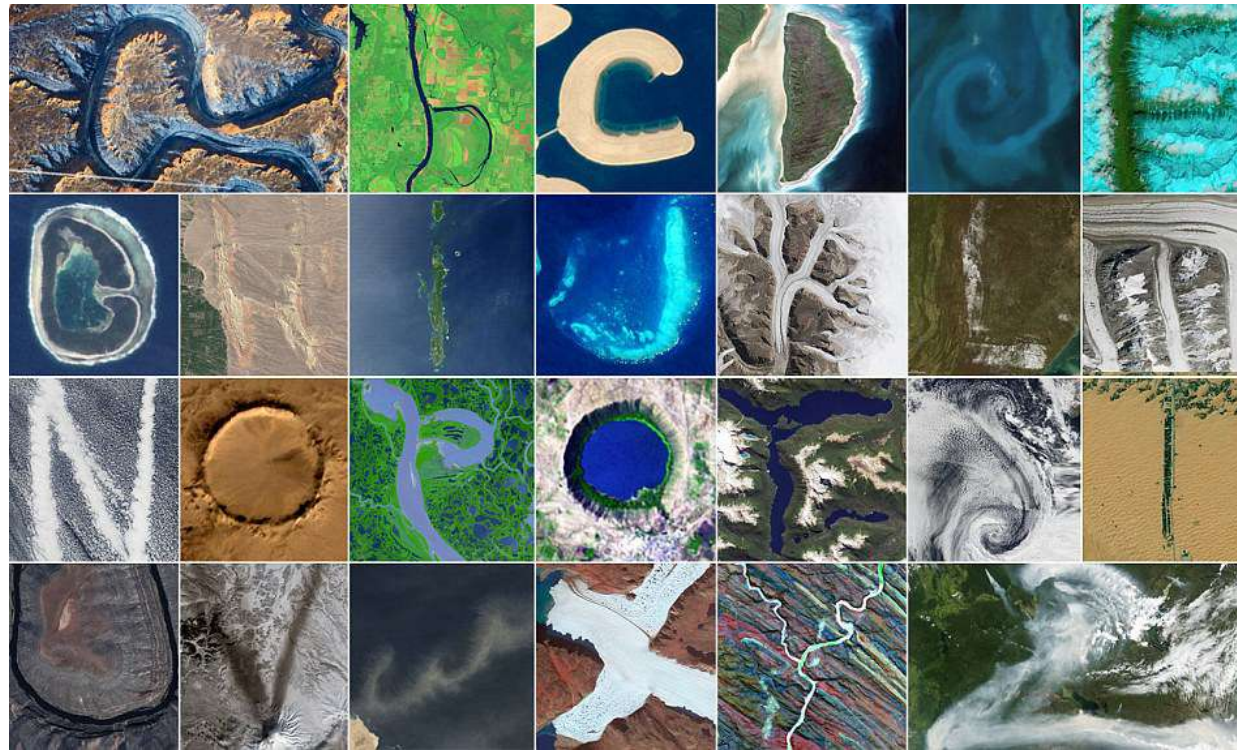

*Student  
examples*

*Artist  
examples of  
found letters,  
satellite and  
drone/plane  
images*

## Artist examples

*Graffiti, architecture, buildings, lamp posts, doors, windows etc.*

# Arranging objects examples

Arranging objects examples

Arranging objects examples

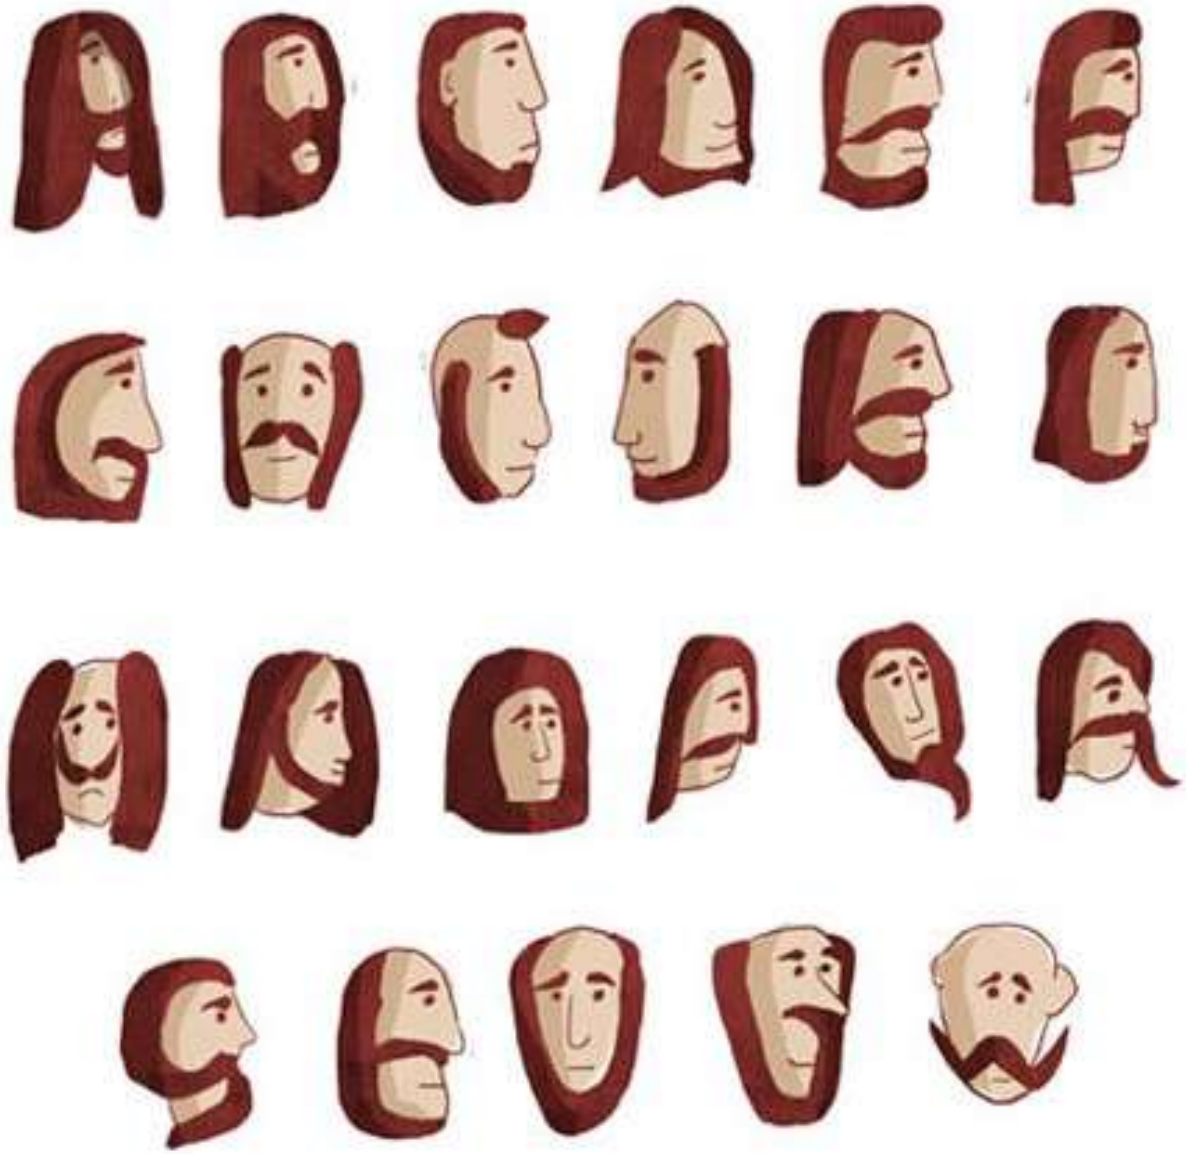

## Arranging objects examples

*If you want to do quotes or names, try and take multiple photos of the same letter for more visual variety*

*Illustrations, cool concept to try...*

# Conceptual example

A for apple

B for Banana

C for Cucumber ...etc.

**We will try using Google Slides to  
piece them together!**
