

April 17, 2017

The providers of Clarinda Medical Associates highly promote full well child checks at the time of their Sports Physicals. An appointment for a full well check offers the time needed to do the appropriate vision and hearing screening. Issues appropriate to the age of the student are discussed. It is also an excellent time to review the immunization history and catch the student up on the recommended immunizations. Sports Physical forms are also completed and signed.

We encourage parents to take full advantage of the benefits of health insurance to offer the most in preventative care for their child.

Sports Physicals will also be offered as requested during a limited one week time period. Immunizations and other issues will not be addressed at this visit.
