

Enhancing Data Literacy in AP Biology with HHMI BioInteractive Resources

A FREE 2-Day Workshop

**Tuesday and Wednesday, July 16-17, 2019
8:30AM-3:30PM**

**Rocky River City Schools' District Offices
1101 Morewood Parkway
Rocky River, Ohio**

Using data to develop scientific explanations is the foundation of scientific discovery. BioInteractive resources provide students with authentic opportunities to strengthen their data analysis and communication skills while developing an understanding of core ideas in biology through the practices of science. This workshop will focus on how to guide students in developing an understanding of the statistical analysis skills required in AP Biology and how to communicate the meaning of data effectively.

- Receive free classroom-ready materials for implementing science practices in biology classes.
- Enhance your content knowledge and classroom practice.
- Focus on rigorous, standards-aligned pedagogy.
- Breakfast and lunch provided.
