Mrs. Houston

AP Computer Science

Snow Day Lesson Plan 1

BIOMETRICS AND COMPUTER SECURITY

1. Biometrics is a science that has identified individuals' unique biological characteristics, such as the sound of a person's voice or the patterns of a fingerprint. Biometrics is now being used to make computer systems more secure.
    a. What are two advantages over traditional password-based protection?

    b. What are the most commonly used types of biometrics being used? List and explain each.

2. Go to: http://ice.cc.gatech.edu/apexam_final Take a 40 question exam online.
