AP U.S. History [APUSH] is designed to be the equivalent of a two-semester introductory college or university United States history course.

In APUSH, students investigate significant events, individuals, developments, and processes in nine (9) historical periods from approximately 1491 C.E. to the present.

The course provides eight (8) themes that students explore throughout the course to make connections among historical developments in different times and places: interaction between humans and the environment; development and interaction of cultures; state building, expansion, and conflict; creation, expansion, and interaction of economic systems; and development and transformation of social structures.

Students develop and use the same skills, practices, and methods employed by historians: analyzing primary and secondary sources; developing historical arguments; making historical comparisons; and utilizing reasoning about contextualization, causation, and continuity and change over time.
