

OSVOJI  ZNANJE

ARITHMETIC CARDS

Dear parents! Site »Osvoji Znanje« (in slovene it means »Gain the knowledge«) gives you freebie, our unique playing card game »Arithmetic cards«. With these cards, kids can strengthen their arithmetic skills. It includes adding, subtracting, multiplying and dividing numbers from 0 to 100. Game can be fun for the whole family 😊

Purpose of the game

Each player tries to get rid of all his cards with performing basic arithmetic operations (addition, subtraction, multiplication and division).

Description

Each card has two numbers from 0 to 100 on the front side. There are 93 cards.

Preparing the game

Print the attachment, which follow the instructions (6 sheets) and cut out the cards (see the dotted lines). You can also laminate them.

How to play

- Deal each player seven cards.
- Place one card (the start card) face-up on the table. This card is first card in the discard pile.
- Put the deck of remaining cards face-down (the draw pile).
- The youngest player starts the game. He use both numbers from the card on the table and use them in math expression (e.g. if numbers on the card are 5 and 10, expression can be $10-5$, $5+10$, $10:5$, $5*10$...).
- If result of math expression equals any of the numbers on the cards in his hand (both numbers on each card are taken into account), particular card becomes »the match card« (in our case, any card with numbers 5, 15, 2 or 50 is »the match card«)
- If »the match card« exists, player puts it face-up on the table (on the top of discard pile).
- If he cannot find »the match card«, he picks a card from the draw pile, but he cannot use it immediately. He must wait the next turn.
- The player, who first gets rid of all his cards, is the winner.
