

WEEK 3

# ART-FULL FRIDAY

APRIL 20-24

## HEY Y'ALL

Hi friends! I am sure Spring Break looked different from what many of your families had planned. I know mine did. But I was still able to enjoy it and I hope you did too. This time with family has been wonderful and I hope you all feel the same way. We have spent more time than usual together, do things we normally don't make time for. My hope is that you have too! I've got a fun and challenging lesson planned for this week. I can't wait to see what you all come up with! Enjoy.

## STILL LIFE

Another popular subject matter among artists are the objects around them. For centuries, artists have drawn everyday and special objects. This style of art is called Still Life. It can be used document precious items and everyday life or to practice techniques and improve skills. The lesson presentation includes a video about still lifes and examples from famous artists.

## LESSON

Use the [Google Presentation](#) for the lesson to learn more about still lifes. You will have two options for completing the lesson. The first is collect objects from around your home and arrangement into a still life or find a space in your home and draw the objects where they are located. The second is to use the drawing guides provided. There are flowers and food to choose from. Have fun and don't forget to be creative.

## UNTIL NEXT TIME

CI hope you had fun learning about and drawing your own still life. I wish we were together in the art room to create our work together. Don't forget to keep making art and take time to practice being creative! I can;t wait until we are together again!
