For this project, you will be researching one of the photographers on the list below. You are to then create a Google SlideShow, Canvas Website or Adobe Spark Page (under your school email) to share about the artist with your classmates with 5 photographs of theirs and twelve photos of yours (six will be recreating their photo).

The presentation must include the following information:

- **1**. Title Page- artist name and your name
- **2**. Artist name, date and place of birth and/or death, as well as a photograph of them.
- **3**. What are they known for- commercial, fine art, documentary, war photography? Explain what that career is (what does it mean to be a commercial photographer/ fine art photographer/ documentary?)
- **4**. Interesting details about them, such as, where they went to school, what they are best known for, characteristics of their work…what makes them unique? What made them famous? What makes them different then the other photographers out there? Please don't just copy and paste information, and tell us stuff that is actually interesting.
- **5- 9**. <u>FIVE images of THEIR work</u>, with the title (if it's listed) and date. Try to get as high resolution images as possible, and be sure it is definitely by that artist and not "in the style of". Make sure you include their most well known photograph!! Include within your speech any information you can find about the photographs, specifically what it is of, where were they made, was this part of a photo series, who was the client, where was it published- you will be discussing it within your presentation. Make sure these are high resolution images.
- **10- 21** <u>Include TWELVE photographs emulating the style of the photographer.</u> <u>Your first SIX will RECREATE the SPECIFIC COMPOSITION of SIX of the photographer's photographs</u>- make sure they are different then the previous five that you showed already (so that you show ELEVEN total of your photographer's work), and <u>then TAKE 6 ADDITIONAL PHOTOGRAPHS OF YOUR OWN IN THEIR STYLE</u>. (So essentially, 6 TRYING TO GET YOUR PHOTO TO LOOK LIKE THEIR PHOTO AND 6 MORE OF YOUR OWN IN THEIR STYLE INFLUENCED BY THEM) Think about using appropriate props/clothing. Discuss in your presentation how you were emulating their photographic style.
- **22.** Your personal opinion of the artist- what made you choose that person? What is it that you like about their style? What did you learn about your own photography versus their photography? (must be in complete sentences and in paragraph form)
- **23**. Sources listed- Must have three or more sources with the website's proper name and url. If the photographer has their own personal website, it must be included within your sources!

Things to Consider:

- Page design should emulate the style of the photographer- for example, a presentation on Ansel Adams, the page would be all black and white
- Extra kudos if you find anything on video about them that you can share a short clip (~ 2 minutes) of within your presentation. You can embed this within your page
- You can share their Instagram (if available) page too on an additional element

- Be sure that the page design background doesn't distract from the photographs that you are presenting- only use a colored background (not a photograph) when presenting a photograph by yourself or your photographer.
- Please note: if your photograph isn't going onto Adobe Spark Pages or Google Slides, it may be because of two reasons: It's saved as a Photoshop file - so flatten the layers and save as a jpg. OR It's larger than 10 MB - so open up in Photoshop, go to image size, and change the resolution to 200 and decrease the size to get it less than 10 MB (not much further though- say, 9 mb). Save it as lastname-firstname-artistname-smaller.jpg so that you can differentiate that it's smaller and still keep the original file.
