DDM Implementation Readiness:	Seeking an Extension for Some Grades/Subjects

Has the district reached a ratified contract agreement with respect to DDMs and Student Impact Ratings?	Yes
	05/25/12

Since March of 2012, an Educator Evaluation Team has been working, with this team consisting of administrators and teacher representatives from across the grades and curriculum areas. In a recent meeting with the teachers' union leadership, we agreed that our orignial MOA applied to all facets of the educator evaluation system - including DDMs. Our communications are ongoing, collegial and collaborative. We respectfully request the ability to review these again in the fall and throughout the upcoming school year, making adjustments that we, the APS Team, believe will further our commitment to supporting our students in their achievement and our teachers in their capacity to challenge and support our students to reach their full potential.

Extension Requests: Districts may request a one-year extension of the time to implement DDMs for specific grades/subjects or courses for which DDMs have not yet been identified. Please click on the **blue Extension Request tab** below to fill out the Extension Request form.

Instructions: Complete the tables in the tabs below labeled Teachers, CVTE Teachers, SISPs, and Administrators to indicate the DDMs your district will be implementing during the 2014-15 school year. Each unique DDM should be entered only once, even if multiple groups of educators will be using a single DDM. Enter only one DDM per row. Educators' names are not to be entered in this plan. If your district does not employ CVTE teachers, leave that tab blank. As a reminder, all educators working in positions that require ESE licenses must be matched with at least two measures of student learning, growth, or ochivement. Completed plans must be emailed to EducatorEvaluation@doe.mass.edu no later than June 1, 2014.

Please note: a red marker in the upper-right corner of a cell signals additional instructions for completing the template. Move your cursor over the cell to see these instructions.

Glossary

DDM Sources

District-developed	A DDM developed by educators in the district. May include DDMs developed completely from scratch or those modified from existing assessments.
Commercial	A DDM that is comprised of commercial assessment product.
Open-source	A DDM that is comprised of an assessment made freely available by another district, state, or other entity.

Types of Assessments

Paper/Pencil (On-Demand)	An assessment that takes place at a predetermined time and place, usually under standard conditions for all students being assessed. Examples include the SAT, district and state tests, and most in-class unit tests and final exams.
Performance/Project	An assessment based on observations of behaviors or based on work performed on a complex activity.
Writing Prompt/Essay	An assessment that requires students to produce a written composition on an assigned topic or in response to a particular prompt. Writing assessments often set prescribed lengths for student responses and are scored using a rubric.
Portfolio	A purposeful and systematic collection of student work that often includes: student participation in the selection of portfolio content, criteria for selection aligned to standards and grade-level expectations through
Hybrid	An assessment that combines two or more types of assessments - usually a paper-and-pencil or online test coupled with a performance, portfolio, or project assessment.
Indirect	Indirect measures do not measure student growth in a specific content area or domain of social-emotional or behavioral learning but do measure the consequences of that learning. (e.g., changes in: promotion and graduation rates, attendance and tardiness rates, rigorous course-taking pattern rates, college course matriculation and course remediation rates, discipline referral and other behavior rates, and other measures of student engagement and progress).
Other	Use this answer choice in the rare instance where none of the above labels are applicable for the potential DDM.

Background: Pursuant to the Comissioner's August 15, 2013 DDM memorandum, Districts may request a one-year extension of the time to implement DDMs for specific grades/subjects or courses for which DDMs have not yet been identified. Requests will be reviewed on a district-by-district basis, and will be conditioned on ongoing district progress in implementing DDMs and a clear plan for utilizing the extension (which districts will explain below). Please note that no blanket extensions will be accepted and that acceptance of an extension request is not consideration of a delay, pause, or moratorium on implementation of the educator evaluation system.

Instructions: Complete the table below to request an extension. Each row will represent a unique extension request. Districts requesting an extension for a grade span within a subject area may do so in a single row (e..g, 5-8 physical education). Enter only one extension request per row.

	Grade(s)/Subject or Course	Describe how the labor-management working group will engage educators to use the additional year to research and pilot potential DDMs for each grade/subject or course for which the district is seeking an extension.	Comments	ESE Use Only Extension Request Granted (Y/N)?
1	Business Manager	A new Business Manager has been hired in the Auburn Public Schools and will be joining our team on July 1, 2014. Upon his arrival, I will request that he create/select a minimum of two DDMs and will submit those to DESE in the fall.		
2	A review is requested again in the fall	Although DDMs have been submitted - to the best of my knowledge - for all pertinent educators, I respectfully request that we be granted the opportunity to revisit these in the fall, potentially requesting an extension for a small number of them, should the need arise. Thank you.
