

“

I plan on getting my private pilot's license. Being able to take ground school here will help me get that earlier.”

-Physics of Flight Student

AVIATION GROUND SCHOOL

Aviation Ground School is designed to introduce students to the fundamentals of aviation. Learn through interactive activities, simulations, lectures, and presentations, and earn an endorsement to take the Airman Knowledge Test with the Federal Aviation Administration (FAA).

BLACK HILLS
HIGH SCHOOL

It would be cool to fly planes – getting a seaplane and doing marine biology by going out into the sea and studying sea animals!

-Physics of Flight Student

Aviation Ground School covers a wide range of topics, including:

- **Basic principles of flight**
- **Aircraft systems**
- **Navigation**
- **Weather**
- **Regulations**

Throughout the program, students are introduced to aviation careers, provided a solid foundation, and given the opportunity to fly in a real plane!

Apply learned knowledge into the flight simulator.

Earn an endorsement to take the Airman Knowledge Test.

Save money and get in the air faster!
