

WATCH the Kristina Gremski's video- "Chemistry Needed for Biology", take notes in your BILL, then make a chart comparing the following for the 4 kinds of bonds (covalent, ionic, hydrogen, Van der waals) you should know.

1. Description of bond
2. Is it INTRAmolecular or INTERmolecular bond?
3. Give an example of a molecule where it might be found
4. Strong or weak bond?
