# Course Goals

- **1. Content Knowledge-** Understand the major topics in chemistry
- **2. Think Scientifically-** Ask questions, read/interpret data, test ideas using experiments, defend thoughts using evidence
- **3. Technology Skills-** Google classroom, zoom, google docs/slides

# Course Expectations

- Students are required to **attend the zoom class meeting** every time they are scheduled for the class. I will try my best to message you if they are not attending class.
- Students are required to **hand in their classwork in on google classroom** at the end of every class. If homework is given, students should complete the homework on google classroom before the due date.
- Students are expected to **try their best and pay attention** during the zoom meetings. Students should not be on their phone or browsing the web during this time.

# Parent Involvement

- I would like all parents to be enrolled on the remind app and google classroom. Students have been previously given an assignment to enroll their parents on google classroom and remind so that parents can stay involved.
- Additionally every parent should have a login for genesis. Genesis is used to see your child's grades.
- Pressure your kids to get the highest grade they can. If their grade is not high enough, encourage them to work harder and meet with the teacher for extra help. Any grade less than a B is not acceptable.

# Teacher Web Page

- My teacher web page has relevant information related to the course such as the login codes for zoom, google classroom, and remind. My email address, course syllabus, and the bell schedule is also on that web page.
