

BEGINNING SOUNDS MATS

Students will learn to form each letter correctly with the help of the starting green star and arrow. If the letter has more than one stroke, there is a yellow arrow to help the student continue on in the correct direction. Letters can be formed with a pencil, crayon, or marker. These mats can also be laminated, so students can practice formation with dry erase markers. Students could also build these letters with play doh or pom poms to work on fine motor skills. The possibilities are endless!!!
