

Brain Hat – Med Terms

Color and label each part of the brain. The colors and labels need to match on the left and right half of the brain.

Frontal Lobe

Parietal Lobe

Occipital Lobe

Temporal Lobe

-Include a brief description of what each lobe does with each label.

**** Do not color in the space between the dotted line and the cut line or the glue will not stick**

**** When you cut out the halves leave a white (uncolored) space at the top of only 1 half of the brain to be able to glue the 2 halves together. Another option is to cut strips to glue on the inside of the “hat” to hold the halves together. You can use the extra paper you cut off the brain pictures for the strips**

Grade

Correctly Colored (15 pts) _____

Correctly Labeled (80 pts) _____

Correctly Assembled (5 pts) _____
