Welcome to World History/BRVGS! This course will examine the history, technologies, physical features and cultures of various regions of the world from prehistory through present day, using the World History I curriculum. Through the analysis of course topics, we will uncover and understand the various political and economic systems, ideologies, and conflicts throughout history. Students will be required to think critically and analytically and will express such thoughts through written assignments, class activities and project based learning. Students will be required to take the World History I SOL in December.
