2

FIND

A way that small businesses can compete with larger companies. You can come up with something on your own or use a real instance.

For example:

To compete with Home Depot and Lowes, Bronson Electric, a small local supplier of lighting fixtures, took a look at their customer's needs.

Many needed a place to park their trucks, a small office space to prepare invoices, and a software system for contractors to key in their needs for the next day's work. Overnight, Bronson employees loaded the fixtures onto their trucks. These additional services helped them serve the needs of customers even better than large companies could!

FIND

A common interview question and tips for how to answer it. Then, type your answer and practice it!

For example:

What is your greatest weakness?

Tips: Be honest and explain how you are working to improve it.

"I'm not very good at gauging how long a task will take me to finish. Sometimes I don't delegate enough time to larger, more important projects and I have to rush to get things done. To address the issue I've started setting my own deadlines before the actual deadlines."
