

# Cell Cycle

Putting the Pieces  
Together

- **Instructions:**

- **Puzzle Setup:**

- You will receive a set of puzzle pieces, each labeled with a stage of the cell cycle (G1, S, G2, Mitosis {prophase, metaphase, anaphase, telophase}, Cytokinesis).
    - Each piece corresponds to the events found at [Cells Alive](#)

- **Objective:**

- Arrange the puzzle pieces in the correct order, reflecting the sequence of stages in the cell cycle.
    - Once you have the pieces in order, write a brief description of what happens in each stage on the provided worksheet.
    - Explain your reasoning for why you placed the pieces in that specific order.

- **Steps to Follow:**

- **Step 1:** Start by identifying each stage of the cell cycle and its characteristics.
    - **Step 2:** Begin placing the pieces in the order you believe represents the correct sequence of the cell cycle.
    - **Step 3:** Discuss with your group members (if applicable) to compare ideas and reasoning.
    - **Step 4:** Once confident in your arrangement, write down the sequence and describe what happens in each stage on the worksheet.
    - **Step 5:** Explain your thinking and justify your sequence on this page: [LINK](#)
