

Name:

CER Organizer

Essay Prompt:

People—like scientists, detectives, health workers—take many approaches to solving problems. They take bold and brave actions; they work methodically; they think carefully and logically; they collaborate with others; they try new approaches.

Based on the texts you have read, what stands out to you as one important characteristic to have as a problem solver or investigator?

Include two examples of individuals demonstrating this characteristic in your response.

Claim:

Individual #1:

Evidence:

Reasoning:
