

Chapter 4-6 Review

1. Graph the function with the given domain:

$$y = 1/2x + 2 \quad \text{when } x \leq 3$$

x	y
3	3 1/2
2	3
1	2 1/2
0	2

2. Graph: $y = -\frac{1}{2}|x+2|-3$

vertex: $(-2, -3)$

2.) $6x + 15y = 30$

x-intercept = 5

y-intercept = 2

3. Find the slope of the line that passes through the points: $(3, 4)$ and $(3, 8)$

$$\frac{8-4}{3-3}$$

undefined

4.) $12x - 8y = 60$

slope = $\frac{3}{2}$

y-intercept = $-\frac{15}{2}$

$$-8y = -12x + 60$$

$$y = \frac{3}{2}x - \frac{15}{2}$$

5. Given that y varies directly with x , write an equation that relates x and y when $x = 2$ and $y = -3$

$$y = ax$$

$$-3 = \frac{3}{2}a$$

$$y = -\frac{2}{3}x$$

6. If $f(x) = -3x^2 - 2x$, find $f(-1)$:

$$f(-1) = -3(-1)^2 - 2(-1)$$

$$f(-1) = -3 + 2$$

$$f(-1) = -1$$

7. Write an equation in Standard Form that goes through $(2, 3)$ $(-4, 5)$

$$x + 3y = 11$$

$$\frac{5-3}{-4-2} = \frac{2}{-6} = -\frac{1}{3} = m$$

$$y = -\frac{1}{3}x + b$$

$$3 = -\frac{1}{3}(2) + b$$

$$3 = -\frac{2}{3} + b$$

$$b = \frac{11}{3}$$

$$\left[y = -\frac{1}{3}x + \frac{11}{3} \right] \times 3$$

$$3y = -x + 11$$

$$x + 3y = 11$$

or

$$x + 3y = c$$

$$2 + 3(5) = c$$

$$c = 11$$

8. Write the equation of the line that goes through $(2, 4)$ and is parallel to $x = 5$.

$$x = 2$$

9. Solve the inequality and graph the solution on a number line:

$$\frac{2}{3}x + 3 \leq -7$$

$$\frac{2}{3}x \leq -10$$

$$2x \leq -30$$

$$x \leq -15$$

Solve each compound inequality below. Graph the solution set on the number line provided:

10. $3x + 4 < 7$ or $12 - 4x < 24$

$$3x < 3 \quad -12 < 4x$$

$$x < 1 \text{ or } x > -3$$

10. \mathbb{R}

11. $-9 < -3x + 6 < 9$

$$3 > x - 2 > -3$$

$$5 > x > -1$$

11. $-1 < x < 5$

12. $-2 \left| \frac{1}{2} - 3w \right| + \frac{7}{2} = \frac{1}{2}$

$$-2 \left| \frac{1}{2} - 3w \right| = -3$$

$$\frac{1}{2} - 3w = \frac{3}{2} \text{ or } \frac{1}{2} - 3w = -\frac{3}{2}$$

$$-3w = 1$$

$$w = -\frac{1}{3}$$

$$-3w = -2$$

$$w = \frac{2}{3}$$

12. $-\frac{1}{3}, \frac{2}{3}$

13. $-4 | 7y + 2 | = 32$

13. \emptyset

14. I want to make a snack mix of pretzels and Corn Chex. Pretzels come in bags that are 15 ounces and Corn Chex comes in boxes that are 12 ounces. I want my mix to be 300 ounces and I don't want any waste.

a. Write the standard form of an equation that models the possible combinations of boxes and bags to make my mix.

$$15p + 12c = 300$$

$$5p + 4c = 100$$

b. List two possible combinations:

1. 0 bags of pretzels 25 boxes of Corn Chex

2. 20 bags of pretzels 0 boxes of Corn Chex

15. If you sign up for a gym membership during the month of May you are charged a joining fee of \$99 and a monthly membership of \$30 per month.

a. Write an equation that gives you the total cost in dollars of a membership as a function of the number of months of membership if you join in May.

$$y = 30m + 99$$

b. What does the y-intercept represent in this equation?

joining fee

c. Find the cost if you sign up for a 5 month membership.

\$ 249
