

## CHAPTER 11 QUIZ A

Student Name \_\_\_\_\_ Date \_\_\_\_\_ Grade \_\_\_\_\_

1. Which term describes the sense of whirling, dizziness, and the loss of balance?
  - a. equilibrium
  - b. homeostasis
  - c. vertigo
2. Which term describes a defect in the right or left half of the visual field?
  - a. amblyopia
  - b. hemianopsia
  - c. hemiplegia
3. Which condition is also known as farsightedness?
  - a. esotropia
  - b. hyperopia
  - c. myopia
4. Which term means an abnormal discharge from the ear?
  - a. otopyorrhea
  - b. otorrhagia
  - c. otorrhea
5. Which hearing loss is progressive and associated with aging?
  - a. noise-induced
  - b. presbycusis
  - c. presbyopia
6. Which condition is characterized by the outward deviation of one eye relative to the other?
  - a. astigmatism
  - b. esotropia
  - c. exotropia
7. Which term describes the buildup of pus within the middle ear?
  - a. otitis media
  - b. purulent otitis media
  - c. serous otitis media
8. Which term means the appendages or accessory structures of an organ?
  - a. adnexa
  - b. dacryocyst
  - c. labyrinth
9. Which procedure provides temporary protection when the eyelids are paralyzed?
  - a. blepharoplasty
  - b. tarsectomy
  - c. tarsorrhaphy
10. Which condition is also known as double vision?
  - a. amblyopia
  - b. diplopia
  - c. nyctalopia
11. Which diagnostic test is used to measure hearing?
  - a. audiometry
  - b. tonometry
  - c. tympanometry
12. Which term describes the technique for removing a cataract including the surrounding capsule?
  - a. extracapsular extraction
  - b. intracapsular cataract extraction
  - c. phacoemulsification

13. Which test measures intraocular pressure?
  - a. refraction
  - b. Snellen test
  - c. tonometry
14. Which term means a surgical incision into the eardrum to create an opening for the placement of tympanostomy tubes?
  - a. myringectomy
  - b. myringotomy
  - c. tympanocentesis
15. Which abbreviation means right eye?
  - a. OD
  - b. OS
  - c. OU
16. Which term describes the fibrous tissue outer layer of the eye?
  - a. choroid
  - b. retina
  - c. sclera
17. Which laser treatment is used to treat closed-angle glaucoma?
  - a. laser iridotomy
  - b. laser retinopexy
  - c. laser trabeculoplasty
18. Which term describes a condition of involuntary, constant, rhythmic movement of the eyeball?
  - a. astigmatism
  - b. nystagmus
  - c. strabismus
19. Which term describes the process whereby the eyes make adjustments for seeing objects at various distances?
  - a. accommodation
  - b. convergence
  - c. refraction
20. Which disorder has symptoms that include a sense of whirling, dizziness, and the loss of balance?
  - a. eustachitis
  - b. Ménière's disease
  - c. labyrinthitis
21. Which term describes the region where vision is sharpest on the retina?
  - a. fovea centralis
  - b. macula lutea
  - c. optic disk
22. Which term describes a condition characterized by increased intraocular pressure resulting in damage to the optic nerve?
  - a. cataract
  - b. glaucoma
  - c. macular degeneration
23. Which structures of the ear are important in maintaining equal atmospheric pressure within the middle ear?
  - a. auditory ossicles
  - b. eustachian tubes
  - c. semicircular canals
24. Which term describes the angle where the upper and lower eyelids meet?
  - a. canthus
  - b. epicanthus
  - c. tarsus
25. Which term means inflammation of the tympanic membrane?
  - a. eustachitis
  - b. mastoiditis
  - c. myringitis
