

CHAPTER 6 QUIZ A

Student Name _____ Date _____ Grade _____

1. Which term means harmful, tending to spread, becoming progressively worse, and life-threatening?
 - a. anomaly
 - b. benign
 - c. malignant
2. Which autoimmune disorder attacks the intestines, ileum, or colon?
 - a. Conn's disease
 - b. Crohn's disease
 - c. Grave's disease
3. Which term describes a benign tumor made up of abnormal lymphatic vessels?
 - a. angioma
 - b. lymphangioma
 - c. lymphoma
4. Which term means a malignant new growth of epithelial cells?
 - a. blastoma
 - b. carcinoma
 - c. sarcoma
5. Which gland plays important roles in both the immune and cardiovascular systems?
 - a. liver
 - b. spleen
 - c. thymus
6. At which stage of breast cancer is the cancer no larger than 2 centimeters and has not spread outside the breast?
 - a. I
 - b. II
 - c. III
7. Which term means a carcinoma derived from glandular tissue?
 - a. adenocarcinoma
 - b. adenoiditis
 - c. lymphoma
8. Which substance produced in the laboratory is used as a postexposure preventive measure against certain viruses, including rabies?
 - a. monoclonal antibodies
 - b. synthetic immunoglobulins
 - c. synthetic interferon
9. Which structures located in the intestine form lymphocytes?
 - a. appendix
 - b. lacteals
 - c. Peyer's patches
10. Which substance causes noninfected cells to form an antiviral protein that slows or stops viral multiplication?
 - a. complement
 - b. interferon
 - c. plasma cells
11. Which term means a malignant tumor derived from muscle tissue?
 - a. myeloma
 - b. myelosarcoma
 - c. myosarcoma

12. What form of therapy involves the use of radioactive materials implanted into the tissues to be treated?
 - a. antineoplastic
 - b. brachytherapy
 - c. teletherapy
13. Which organ or structure has a major hemolytic function?
 - a. bone marrow
 - b. spleen
 - c. thymus
14. Which form of immunity is obtained by an attack of an infectious disease?
 - a. artificial active immunity
 - b. natural active immunity
 - c. natural passive immunity
15. Which term describes medication used to prevent the rejection of donor tissue?
 - a. antihistamine
 - b. immunosuppressant
 - c. immunotherapy
16. Which test is used to confirm an HIV diagnosis?
 - a. ELISA
 - b. scratch test
 - c. Western blot
17. Which term describes any substance that the body regards as foreign?
 - a. agglutinin
 - b. antibody
 - c. antigen
18. Which term means an inflammation of the adenoids?
 - a. adenoiditis
 - b. adenosis
 - c. adrenalitis
19. Which of these diseases is caused by a parasite?
 - a. aspergillosis
 - b. malaria
 - c. moniliasis
20. Which viral infection is commonly known as chickenpox?
 - a. cytomegalovirus
 - b. herpes zoster
 - c. varicella
21. Which form of bacteria causes Lyme disease?
 - a. rickettsia
 - b. spirochete
 - c. staphylococci
22. Which term describes the process by which a tumor creates its own blood supply?
 - a. angiogenesis
 - b. angiostenosis
 - c. anti-angiogenesis
23. Which term is the verb describing the process by which cancer spreads from the primary site to a secondary site?
 - a. metabolism
 - b. metastasis
 - c. metastasize

24. Which lymphatic structures are located at the base of the tongue?
 - a. lingual tonsils
 - b. nasopharyngeal tonsils
 - c. palatine tonsils
25. Which term means an abnormal accumulation of fluid in the legs and ankles that occurs when veins or lymph vessels do not drain properly?
 - a. lipedema
 - b. lymphedema
 - c. lymphoma
