

Chemistry - Organic: Unit 10 - Elimination Reactions (E1 and E2)

Unit #:	ACVSD-00070757	Date(s)	
Team: Kristin Hurrelbrink (Author) Grade(s): 11, 12 Subject(s): Science			
Unit Focus			
Students will build upon the SN1 and SN2 reactions to learn about elimination (E1 and E2) reactions. The four factors learned in the previous chapter will come into play. Students will learn how to predict which type of reaction will occur.			
Prior Learnings/Connection			
mechanisms, "four factors" from SN1 and SN2 reactions, acid/base chemistry, nucleophiles, formal charges, curved arrows			
Stage 3: Learning Plan
