Hello World!

Here is where your presentation begins

Contents of This Template

Here's what you'll find in this Slidesgo template:

1. A slide structure based on a multi-purpose presentation template, which you can easily adapt to your needs. For more info on how to edit the template, please visit **Slidesgo School** or read our **FAQs**.
2. A **thanks** slide, which you must keep so that proper credits for our design are given.
3. A **resources** slide, where you'll find links to all the elements used in the template.
4. **Instructions for use**.
5. Final slides with:
   - ⬡ The **fonts and colors** used in the template.
   - ⬡ More **infographic resources**, whose size and color can be edited.
   - ⬡ Sets of **customizable icons** of the following themes: general, business, avatar, creative process, education, help & support, medical, nature, performing arts, SEO & marketing, and teamwork.

You can delete this slide when you're done editing the presentation.

Whoa!

It could be the part of the presentation where you can introduce yourself, write your email…

"This is a quote. Words full of wisdom that someone important said and can make the reader get inspired."

—SOMEONE FAMOUS

The Slide Title Goes Here!

Do you know what helps you make your point clear? Lists like this one:

- They're simple
- You can organize your ideas clearly
- You'll never forget to buy milk!

And the most important thing: the audience won't miss the point of your presentation

Maybe You Need to Divide the Content

Mercury

Mercury is the closest planet to the Sun and the smallest one in the Solar System—it's only a bit larger than our Moon. The planet's name has nothing to do with the liquid metal, since it was named after the Roman messenger god, Mercury

Venus

Venus has a beautiful name and is the second planet from the Sun. It's terribly hot—even hotter than Mercury—and its atmosphere is extremely poisonous. It's the second-brightest natural object in the night sky after the Moon

You Could Use Three Columns, Why Not?

Mars

Despite being red, Mars is actually a cold place. It's full of iron oxide dust, which gives the planet its reddish cast

Venus

Venus has a beautiful name and is the second planet from the Sun. It's terribly hot, even hotter than Mercury

Neptune

Neptune is the farthest planet in our Solar System. It's the fourth-largest by diameter and the densest

A Picture Always Reinforces the Concept

Images reveal large amounts of data, so remember: use an image instead of long texts.

A Picture Is Worth a Thousand Words

Awesome Words

Use a Graph to Display Your Data

Mars

Despite being red, Mars is a cold place. It's full of iron oxide dust

Saturn

Saturn is a gas giant, composed mostly of hydrogen and helium

MAR   APR   MAY   JUN

If you want to modify this graph, click on it, follow the link, change the data and replace it

Infographics Make Your Idea Understandable…

Mars
Despite being red, Mars is a cold place. It's full of iron oxide dust

Jupiter
It's a gas giant and the biggest planet in our Solar System

Venus
Venus has a beautiful name and is the second planet from the Sun

Saturn
Saturn is a gas giant, composed mostly of hydrogen and helium

Sometimes, Reviewing Concepts
Is a Good Idea

Mercury

Mercury is the closest planet to the Sun

Mars

Despite being red, Mars is a cold place

Jupiter

It's the biggest planet in our Solar System

Neptune

Neptune is the farthest planet from the Sun

Venus

Venus has a beautiful name, but it's terribly hot

Saturn

Saturn is the ringed planet and a gas giant

Try Using Infographics!

Jupiter

It's the biggest planet in our Solar System

Mercury

Mercury is the closest planet to the Sun

Venus

Venus has a beautiful name, but it's terribly hot

…And the Same Goes for Tables

	Mass (Earths)	Diameter (Earths)	Surface Gravity (Earths)
Mercury	0.06	0.38	0.38
Mars	0.11	0.53	0.38
Saturn	95.2	9.4	1.16

What about the Percentages?

80%

Mars

Despite being red, Mars is a cold place, not hot. It's full of iron oxide dust

40%

Mars

Despite being red, Mars is a cold place, not hot. It's full of iron oxide dust

This Is a Map

Despite being red, Mars is actually a cold place

Venus has a beautiful name, but it's terribly hot

Mercury is the closest planet to the Sun

A Timeline Always Works Fine

01

Mercury

Mercury is the closest planet to the Sun

02

Mars

Despite being red, Mars is actually a cold place

03

Venus

Venus has a beautiful name, but it's terribly hot

04

Saturn

Saturn is composed of hydrogen and helium

What about Four Columns?

Mars

Despite being red, Mars is actually a cold place. It's full of iron oxide dust, which gives the planet its reddish cast

Venus

Venus has a beautiful name and is the second planet from the Sun. It's terribly hot, even hotter than Mercury

Neptune

Neptune is the farthest planet from the Sun and the fourth-largest by diameter in our Solar System

Saturn

Yes, Saturn is the ringed planet. It's a gas giant, composed mostly of hydrogen and helium

How about This Timeline?

01

Despite being red,
Mars is a cold place

Mars

03

Venus is the second
planet from the Sun

Venus

05

Mercury

Mercury is the
closest planet to the
Sun

02

Saturn

Saturn is composed
of hydrogen and
helium

04

Earth

Earth is the planet
we live on
