

CLIMATE CHANGE STRATEGIES AROUND THE WORLD

For this assignment, you will be researching the ways 2 foreign countries are actively fighting climate change. Unfortunately the U.S. is not one of the greenest countries in the world, so the goal of this task is for you to get ideas from other countries and think about how we could implement these strategies or a similar strategy in Boston.

- Choose two countries from the following list (or if you want to do another country not on this list, you can do that, but you need to make sure you can answer all of the questions):

Denmark:

b.

a. Do you think citizens in Beverly could use this mode of transportation? Why or why not?

b.

1. Are there any laws or regulations that make citizens less likely to use private transportation?

2.

TWO ADDITIONAL FACTS

These websites describe many other ways your country is becoming more sustainable. Choose 2 more topics or “fun facts”

For example: In Tunisia, there is a cartoon character named Labib who teaches kids to clean up beaches and live more sustainably.

In Costa Rica, the country is replanting trees lost to deforestation.

Example 1:

Could we implement this strategy in Beverly / U.S.A? Why or why not?

Example 2:

Could we implement this strategy in Beverly / U.S.A? Why or why not?

SUMMARIZE:

What is your favorite sustainable idea/action from this country? Can we do this in Beverly
