

CLONE TOOL- Photoshop

- 1. Download your photo and open it in Photoshop.
- 2. Add a new blank layer above your photo. 
- 3. Change the sample layer option (at the very top of the screen) to "Current and Below" on the new layer. 

- 4. Find the clone tool on the tool bar. 
- 5. Alt, click an area that you would like to clone from.
(see example below)
- 6. Click and drag your mouse over the area you would like to clone to.

- 7. Alt click here, then drag your mouse over this area to make another cupcake.
