

Photo Color Grid

Assignment

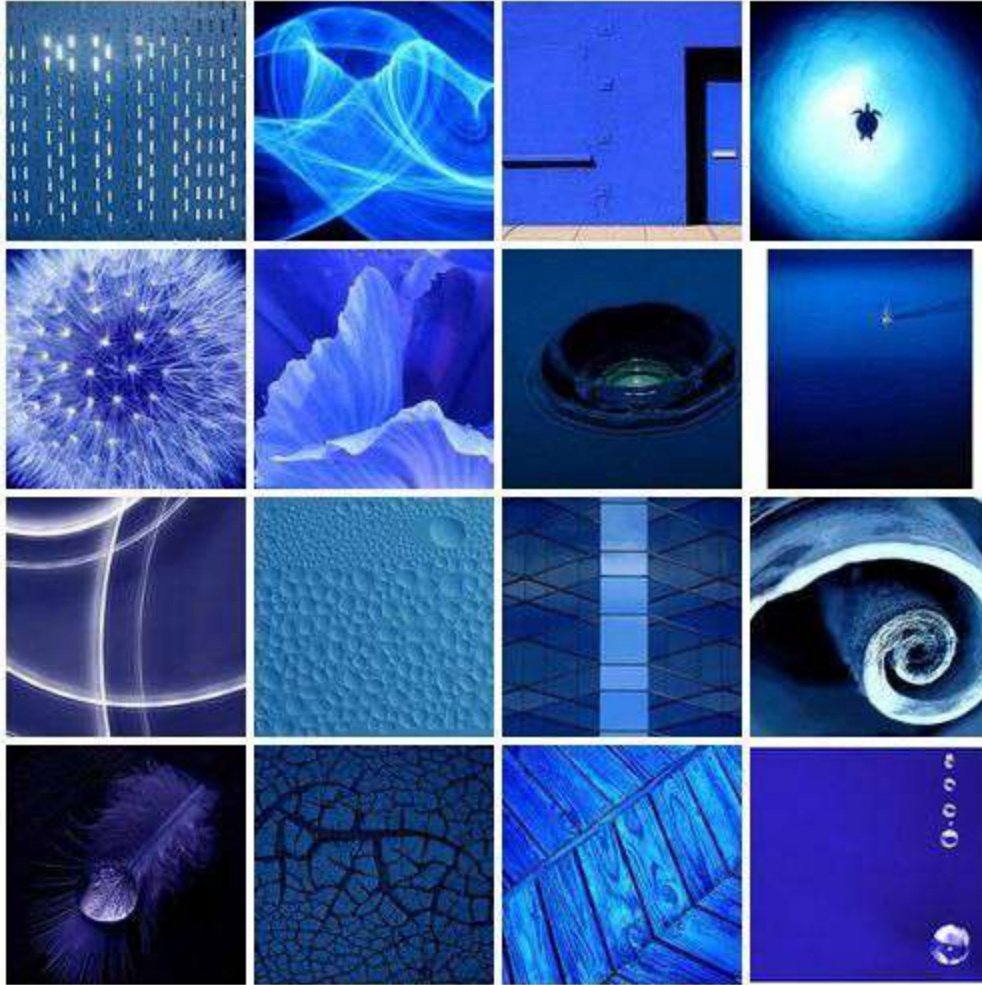

For this assignment you will be asked to create a grid of 16 photographs that have a monochromatic color scheme. Your grid will consist of 16 images at 2"X2" the spacing between the images is .66. All of your images must contain the color and either a tint or shade of the chosen color somewhere in the photo. All of your compositions and lighting should be well thought out and in focus. How you arrange the photos within the grid should also be considered. Take 5 photos of each color object from various angles, you will be choosing the

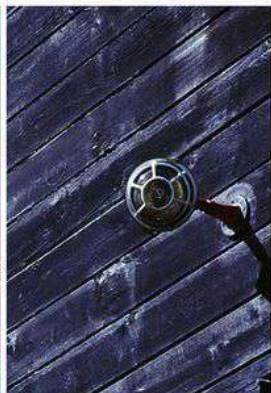

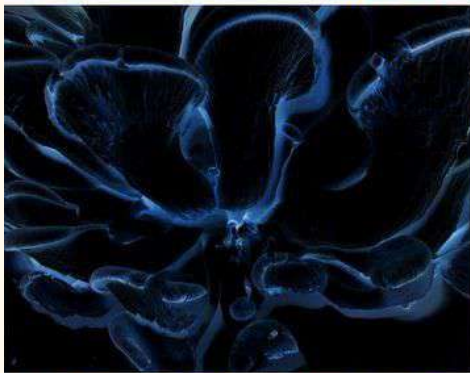

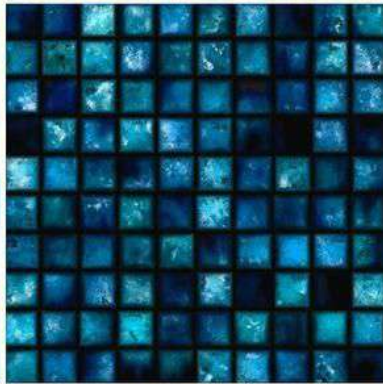

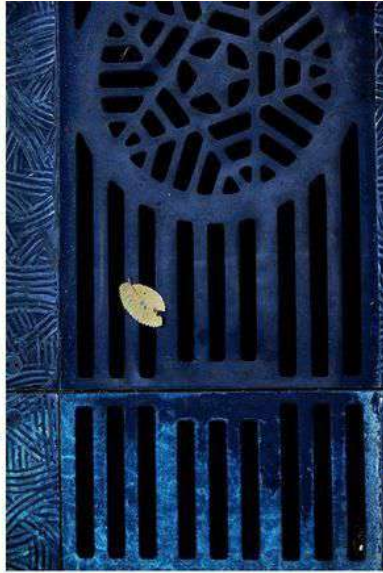

best of those for your grid. Only one photo of each object can be used. Take a photo of 80 photos.
