ROAD
STUDIOS

Imagine together what the future of central campus might look like.

Co-create the Future of Central Campus

Sharing Sessions

Come together to share our wishes and worries about the transition to a central campus.

May 13, 2024 (6-8 pm) – High School Cafeteria

May 14, 2024 (6-8pm) – Zoom

Community Forums

Imagine together what the future of central campus could be.

June 11, 2024 (6-8 pm) – High School Cafeteria

June 13, 2024 (6-8pm) – High School Cafeteria

Intention Behind Community Forums

- Community Forums designed to help us understand **your unique perspective on central campus vision** that stewards the learning and growth of our students.
- Focus is on **WHAT** you are wishing for in a central campus.
- What follows is the critical work of determining what's possible and **HOW** we get there.

Vision Set Up

Looking at Puzzle Pieces

Central Campus Vision

What's Next?

Visioning is Part of the Plan (from May 2023 Board Resolution)

The Board of Education of the Onteora Central School District plans to undertake steps regarding the reconfiguration of grade levels with an **ultimate goal of locating all grade levels in buildings located on one central campus by 2028**, with an acknowledgment and understanding that working toward this goal will **require multiple steps and be guided by ongoing collaboration with the District community**, with such steps to include:

- **Visioning exercises** with students, teachers, families, and members of the community to address the hierarchy of needs and explore innovative ideas.
- **Consultation with the District's architects and fiscal advisors** regarding building conditions and capital project planning, **including determining the design and scope of work that would be necessary for a centralized campus, budget planning, and environmental review.**
- **Voter authorization to fund such a project.**
- **Review and approval of design plans by the New York State Education Department, a competitive bidding process** for the award of contracts, and the commencement and completion of **construction work.**

Commitment from Central Administrators

- Our guiding focus in this vision process is to create the best learning and developmental experience that our school district can for our students. Students are at the center of all we do.
- Student learning and experience is influenced by many things, including: Faculty and staff, curriculum, pace, social and emotional wellbeing, sense of belonging, equity and inclusion, community engagement and support.
- We will lead with intention as we create our central campus. We appreciate your engagement and support through this transition.

Commitment from Central Administrators

As we continue to clarify and work towards our vision for central campus, we will be transparent, open to feedback, and create opportunities to share, hear and respond to your input.

Group Exercise: What do you really want?

Join a small group focused on one of the puzzle pieces to discuss the vision for our central campus. Take notes to share back with the whole group.

You might consider:

What would you like our school district to be known for?

What would be dreamy on our central campus?

What ideas are you most excited about

What else would you like to see included?

What are you curious about now?

What are ways you'd like to see the vision realized right away?

We Imagined Together

We worked independently, in small groups and as a whole group to imagine what our central campus might be. Below you will see an array of ideas that emerged and images of what the creative process looked like.

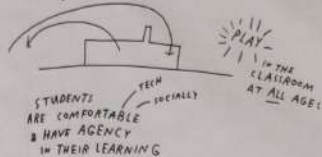

We purposefully avoided limiting our creative process.

CO-CREATING THE FUTURE OF ONTARIO

Parts of Our Vision

- At the heart of our visioning: **Students at the Center** connected to and in partnership with: Engaged Community, Supported Teachers, Thoughtful Leadership, Inspiring and Evolving Spaces, Connected Culture.
- We want to **inspire students across each of the puzzle pieces**. We see the importance of each piece and how these pieces overlap and intersect.
- Student Agency – We want **students to feel comfortable and have choice** in how they move and learn.
- **Small class sizes** offer big opportunities.
- **Uniquely Catskills**. Use resources from end to end. Pride in nature. Learning in nature. Food from this place. Naming spaces and places after the mountains and flora and fauna of our home.
- **Bring the public in**. Community partnerships. Spaces and opportunities for community events. Safe and ease-filled way for community members to volunteer and support student learning and development. Chances to connect students to internships and paid jobs at home.
- **Culture of belonging across age, need and identity**. We want our schools to be safe. For students to see and realize new pathways for success. For our whole school community to thrive here together.

Parts of Our Vision

- We envision a **campus that fosters deep connections**. Between students and with the community. Across ages (K-12) with buddy programs, mentors, whole school gatherings. On campus with infrastructure that fosters this connection like bridges, covered connections between spaces, open spaces big enough for the whole school. Rituals and rhythms to bring people together e.g. morning meeting K-12.
- **Transfer and adapt**. We want to bring beloved Woodstock and Phoenicia traditions and cultures to Boiceville and let them take a new shape.
- Technology is a part of our student's landscape. We envision a **school that is human first while also looking toward a digital future**. We want to be tech-forward but not tech-first.
- When it comes to the workplace and landscape our students will graduate into, a lot is unknown. **How can our curriculum and sense of community make “not knowing” safe?**
- **We wish for our students and whole school community to be well**. There are many ideas for how to embody wellness – mentally and physically – including addressing mental health challenges with support, creating soothing environments, carving out spaces for quiet and meditation, creating a space for teens to hang on campus (and offline), promoting social emotional learning for all ages.
- Honor and appreciate: **The people make this place special**. Support for all. Be a place weekenders want to put down roots. Support keeping local families here. Advocate for affordable housing.

Parts of Our Vision

- Multiple groups envisioned a **glass dome**. The functions imagined were different. It could be a **green house with flowers, a space for an indoor walking track, a meditative space, aromatherapy**.
- **Field House**. An all-season structure with garage doors to let the outside in during warmer weather. Overflow space in cold weather for indoor play and movement. A community gathering space. Potential for being an event rental space with entrepreneurial opportunities for students to play a role in managing.
- **Take advantage of the views**. Could there be a new entry to Bennett that also offers a gathering space for students to look out onto the mountains? What would we want sited on the soccer field? The courtyards, nature trails and gardens. Can we make more opportunities for outdoor learning that connects students to what they see outside?
- **Glass enclosure between schools on campus**. A way to connect buildings for ease of movement. Could this also have collaborative spaces with curvy couches? Could it be designed to catch rain water and grow plants? Let this be a place that allows us to move freely, relax and find inspiration.

Parts of Our Vision

- **Athletic Fields.** Add stadium lights. Create opportunities for night games where community members can come out and support our teams. Outdoor volleyball court. Durable fields with good drainage that allows students to play in all seasons. (Questions on what kind of turf – natural or synthetic – is right fit for our values and priorities.)
- **Expand parts of our campus to other locations.** Curiosity about moving the bus lot and athletic fields to another nearby location. Gives more space for other priorities on central campus. Potential to avoid site challenges for those services on central campus (e.g. electric infrastructure for EV busses; drainage challenges on athletic fields).
- **Bridge Over 28.** Connect our campus to the community and the community to our campus. Safely. Make it easy to get students out on the Rail Trail and along the Esopus. Might the bridge be part of an elevated parking garage.
- **Healthy food = healthy bodies.** Build connections to farmers. Farmers market hosted on campus. Growing food. Afterschool programs that connect students to growing, cooking – even selling food. Teach students life skills of how to nourish themselves.
- **Play creates healthy bodies.** Learn through movement.

WHAT'S NEXT?

What's Next: Commitment from Central Administrators

We will work over the summer with key partners - including the Board of Education, the District's architecture firm, and Point Road Studios – to develop the next chapter of community engagement.

We will share this plan in early Fall 2024.

What is one way we can bring our vision to life now?

“

The path from dreams to success does exist. May you have the vision to find it, the courage to get on to it, and the perseverance to follow it.”

– KALPANA CHAWLA
