

Today's Art Lesson

#CoronaMaison

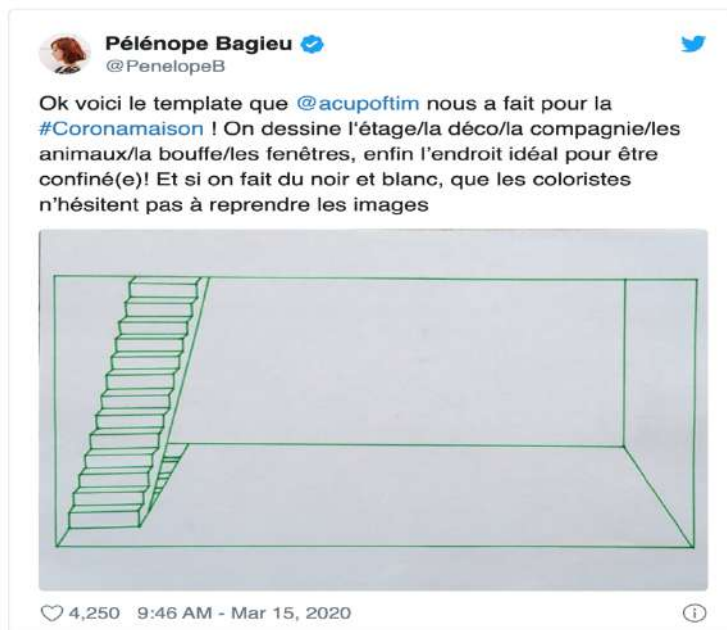

This project, “Corona Masion” is based on an International **exquisite corpse** collaboration that was started by Pélénopé Bagieu, an illustrator based in Paris in March 2020. During the isolation of the COVID 19 Coronavirus pandemic people from around the world are designing their ideal room to spend isolation in.

What is an exquisite corpse?

Exquisite corpse (from the original French term *cadavre exquis*), is a method by which artists create works in a common theme, but with little information on what the others are doing. Each collaborator adds to the composition.

#CoronaMaison, involves each artist using a template of a room with a staircase, and adding their own creative spin. The goal is to illustrate an ideal living space, one where you would be glad to be stuck in for the duration of this pandemic. The idea is that joining all the rooms together will create one giant house, with each creative decorating a room connected to other rooms via the staircase. It's amusing to think how diverse and colorful the house will look like, once connected, with so many different artistic styles! See article in [apartment therapy blog](#)

Here is the room template. As you can see the room is pretty bare...

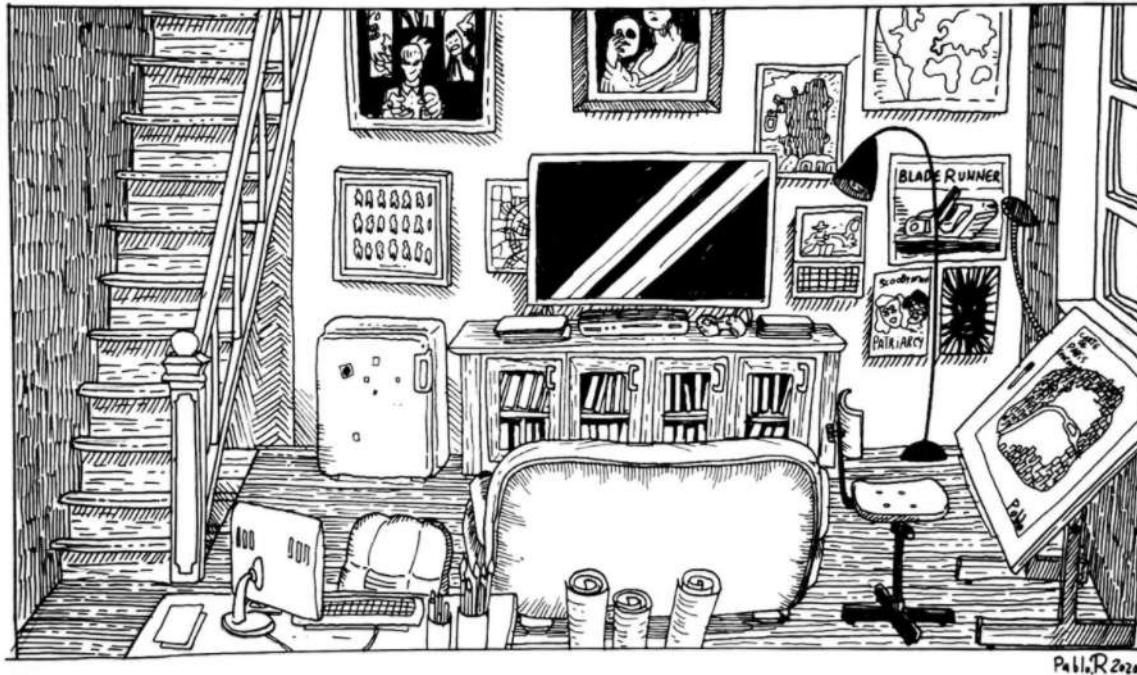

Pélénopé Bagieu writes, “Ok here is the template that Tim Hannem made for the #Coronamaison! We draw the floor / the decor / the company / the animals / the food / the windows, finally the ideal place to be confined! “

This room was drawn by artist Nicolas Gendron. He drew many succulents and... a gardener ghost?

Pablo R drew his home studio.

<http://coronamaison.fun/>

This is the link to see The Corona Maison. The house is growing larger every day! Let's have a look at the rooms that people (of all ages) have created. Every space is very unique!

For this art assignment you are going to design the perfect room to spend the COVID 19 Pandemic in. You design the floor, the décor, the company, the pets, the food, the windows, the view... This is *your* ideal space to be confined!

Use whatever art supplies you have at home. You could make a sculpture instead of a drawing!

Your room must include a staircase because that is what connects all of the rooms together!

Here is an example of a #CoronaMaison sculpture created with Legos

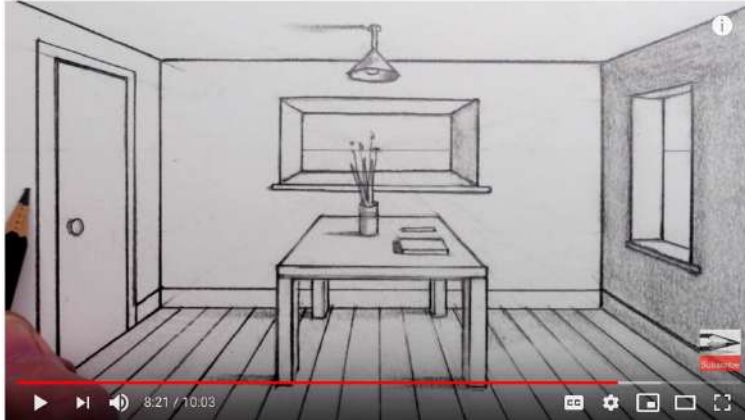

<http://coronamaison.fun/template.jpeg>

Use the link to print the room template.

If you would like to draw your ideal room in perspective.
See this video...How to draw a room in 1-Point Perspective
<https://youtu.be/qOojGBEsWQw>

**Even though we must stay in our separate spaces right now.
We must remember we are all in this together!**

I can't wait to see the room that you create!

Optional. If you would like to contribute to the International Exquisite Corpse Project, Giant House. First ask your parents for permission!

How to contribute...Post your finished room on social networks with the hashtag **#CoronaMaison** all of the drawings received will be "joined into one common building! "
