

NPUSC CURRICULUM CORNER

FALL 2024

Our students are growing because OUR teachers are always learning & growing!

NPUSC Essential Standards Identified

Our educators spent the 2022–2023 school year aligning our ELA Standards but came back to new identified standards from the state in July. That led to collaboration on realigning the standards and assessments to be used in their classrooms. Also, they aligned the Math Standards for all grade levels. Please check out our NPUSC website for the identified ELA & Math standards. We will continue to focus on aligning our essential standards from K–12. Our focus will be on unit planning as a district in our grade level/department teams. Together our educators are creating a guaranteed & viable curriculum for all students.

24/25 HFL Grant will provide the addition of after school clubs. These clubs will be based on student & educator interest. These should be up & running in September.

Our College & Career Director has been busy collaborating with our educators to bring more career exploration to our students. Our spring Career Fair was a huge hit helping our students and community explore local careers. She will continue to work with students, educators, parents and our community to help our students navigate their talents and interests into to a rewarding career! Watch for more info on Naviance (a tool to help our students explore) and more community partnerships.

We are excited to announce we have partnered with Boys & Girls Club to offer afterschool programming for K-8 students beginning in October. This will run Monday-Friday until 6:00 pm. More information coming!

Thank you Health Foundation of LaPorte for your support! Healthy Minds + Healthy Bodies= Healthy Kids!
