Curriculum Map: Digital Information and Technology

Course: DIGITAL INFORMATION TECHNOLOGY I Sub-topic: General

Grade(s): 9 to 12

Course Description: In this course students will complete a series of micro units to cover a variety of digital literacy topics and preview topics covered in detail in our other technology courses. Students will have a better understanding of how information is represented digitally and sent over the internet. Students will learn some basic fundamentals of JavaScript and web design as well as general skills in a variety of application software. With a focus on creativity, problem solving and project-based learning, Digital Information Technology will give students the opportunity to explore several important topics and continue to develop skills to further endeavors in any career field.
