

## Day 12: Eye Mergers

Look through your camera roll and find 5 photos that have cluttered backgrounds, eye snags and/or mergers that distract from the focal point of your image.

Take a screenshot of your photo, and using the pen or marker tool on your phone, circle all the distractions.

Essentially you are critiquing your own photos and looking for the mistakes. Turn in all five screenshots. You can upload them on a collage if you want, or simply upload all five.

Turn in your images here for a grade
