

Day 13A: Assignment, "Shoet"

Your assignment is to shoot a shoe from 25 different angles, edit them either in a contrasty black and white or bright and colorful edit and be consistent with all your editing so all your pictures look the same. For this assignment, you are going to demonstrate your ability to take pictures from many different angles of a shoe.

- Choose your favorite shoe, a well-worn shoe, a colorful shoe, or a friend's shoe, but it has to be a shoe.
- Take a total of 25 DIFFERENT pictures of the same shoe.
- Look for different angles and perspectives on the shoe.
- GET CLOSE and get creative with the shoe! FILL YOUR FRAME!!!
- Choose a well-lit area and make sure the background is not cluttered, which may cause a distraction from the shoe. You can even make a little studio with paper or a sheet to use as your backdrop.
- ****Always tap the screen to lock your focus****
- Put 15-20 of your photos onto a [collage](#). If you have trouble building one that big, make several collages and put those collages together. I strongly encourage you to use a template and have some space between your photos. ****Be creative with your design!****
- Upload your finished collage to Google Classroom
