

Day 14: Color Pantons.

What is the Pantone color system?

Each day, over 10 million designers and manufacturers work with Pantone to select, communicate, and approve color in design.

- Watch this video on [What is a Pantone.](#)
- Now, watch this instructional video by Kelly Clark on Instagram on [How to Make a Pantone.](#)

If you are having any trouble with the Pantone app, download another app called Drop. You can do the exact same effect and that app might work better for you.

"For this assignment I want you to look through your phone and find the most impressive **COLORFUL** photos you have ever taken. You will choose your **four** favorite images and use the color Pantone app to see what the main colors are in the image. The flower pictures you took for the flower assignment would work great for this project.

Your last step will be to put all four on a collage using PicCollage.

**** YOUR PHOTOS SHOULD BE SAVED WITH THE PANTONE NUMBERS LIKE THE IMAGES BELOW**

When you are finished, upload your photos for a grade into Google classroom.
